

Glandula sublingualis

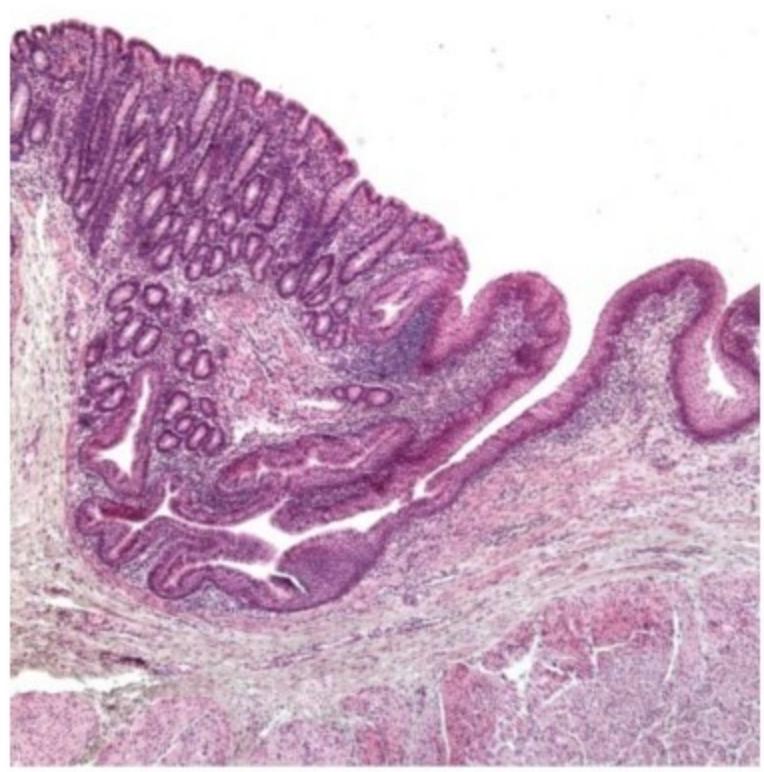

Glandula parotis

Sliznice tenkého střeva

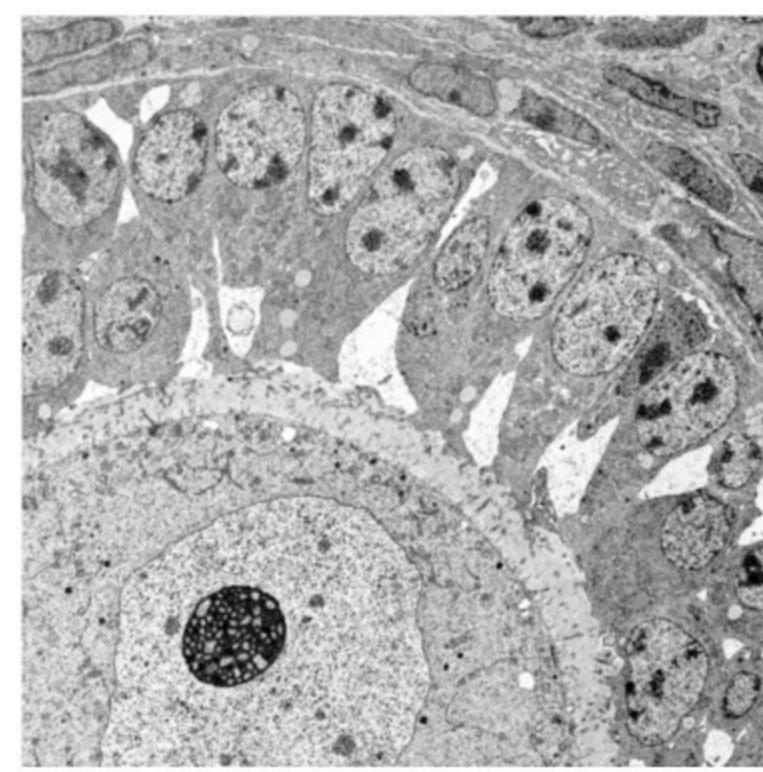

Glandula submandibularis

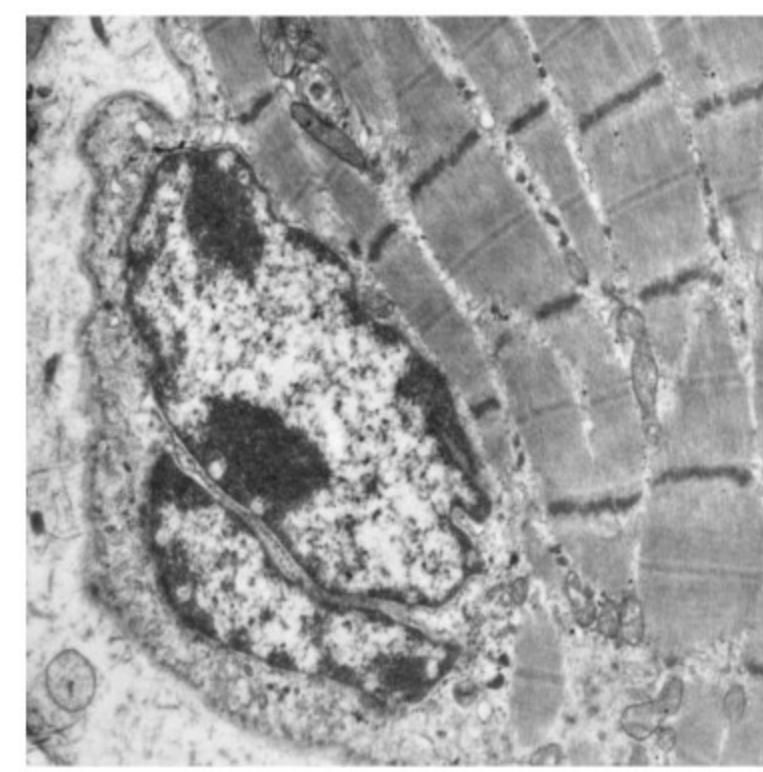

Anus

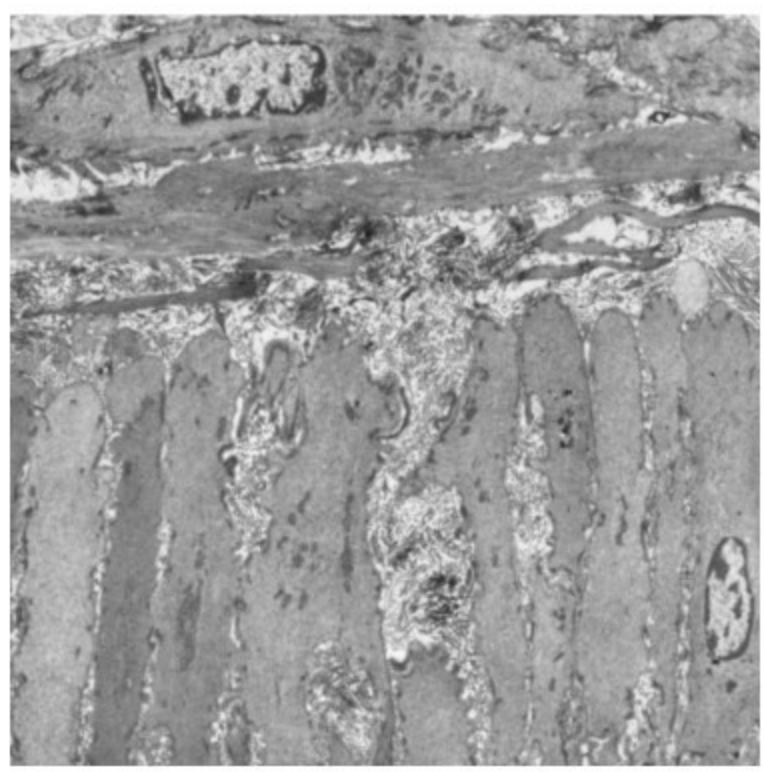

Fasciculus opticus

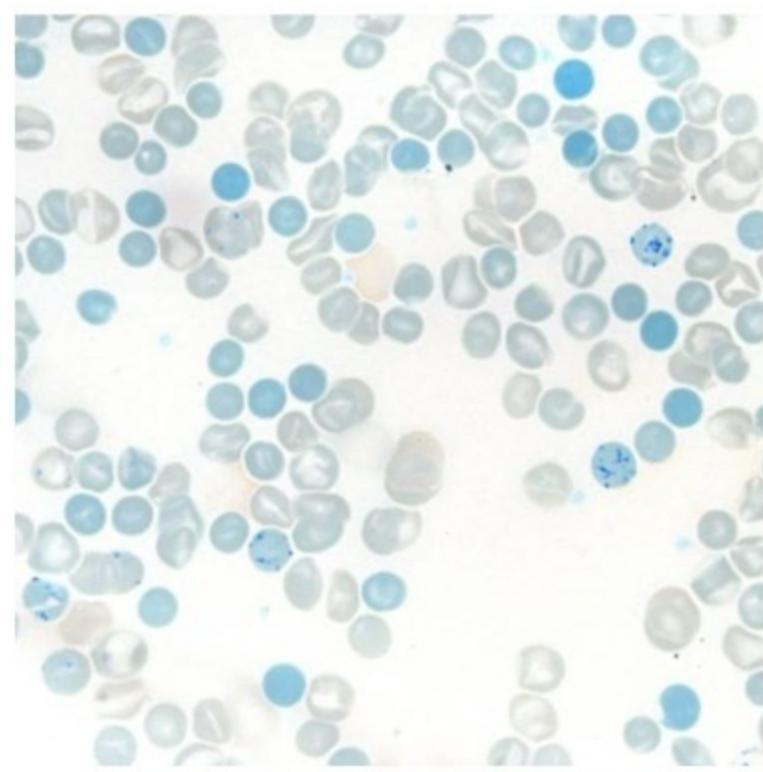

Primární ovariální folikul

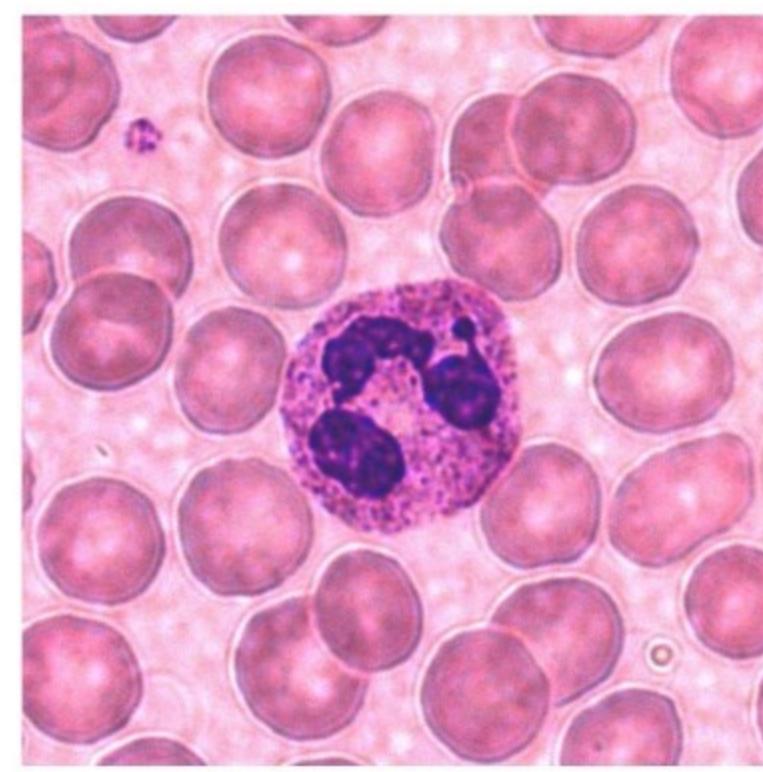

Rhabdomyocyt

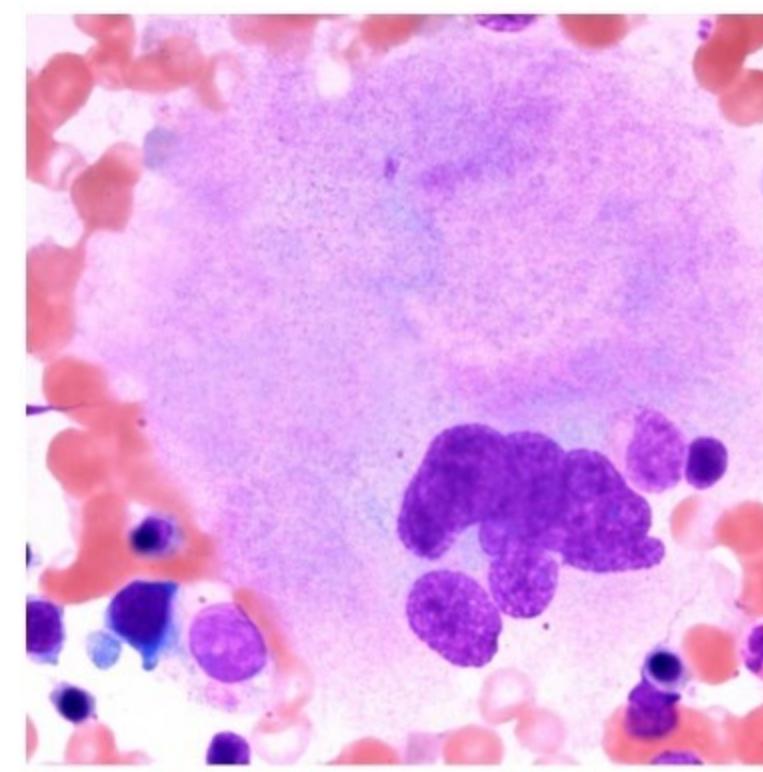

Leiomyocyt

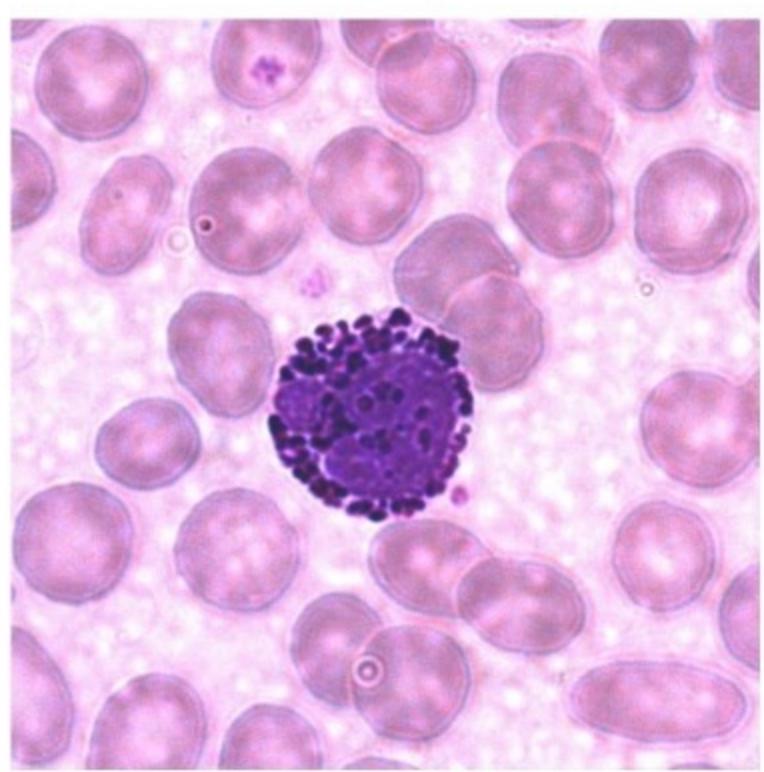

Erytrocyty a retikulocyty

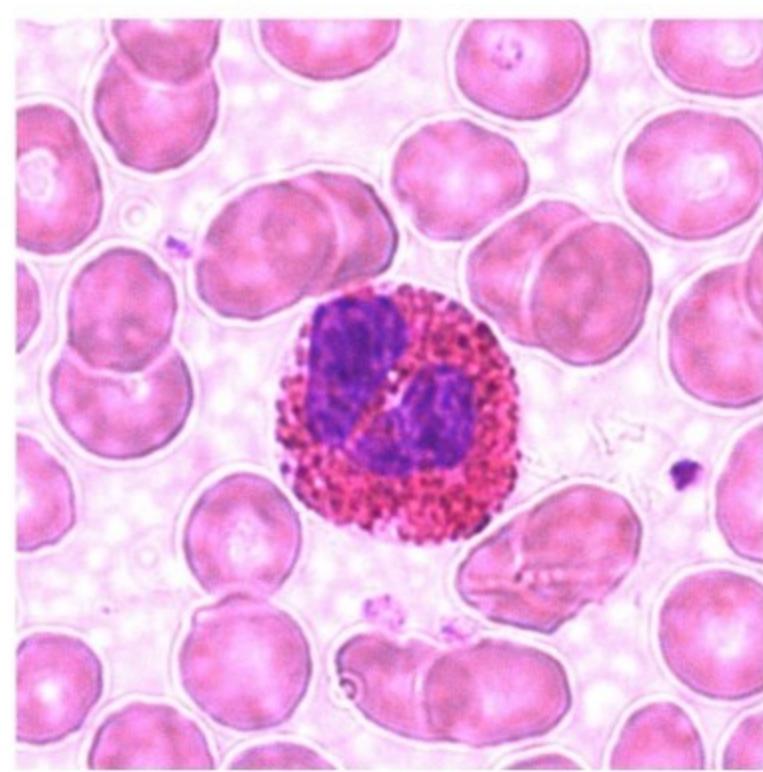

Neutrofilní granulocyt

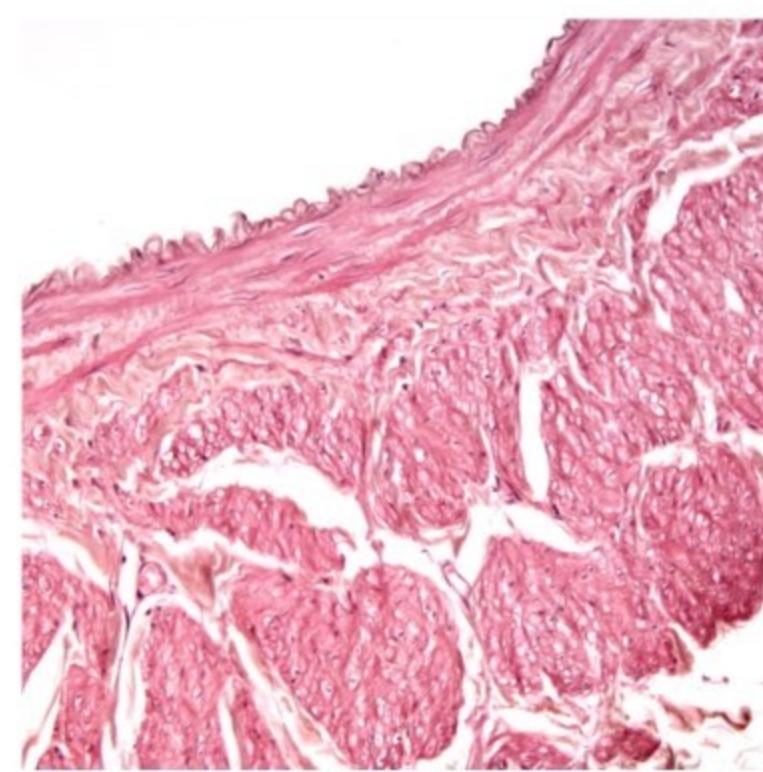

Megakaryocyt

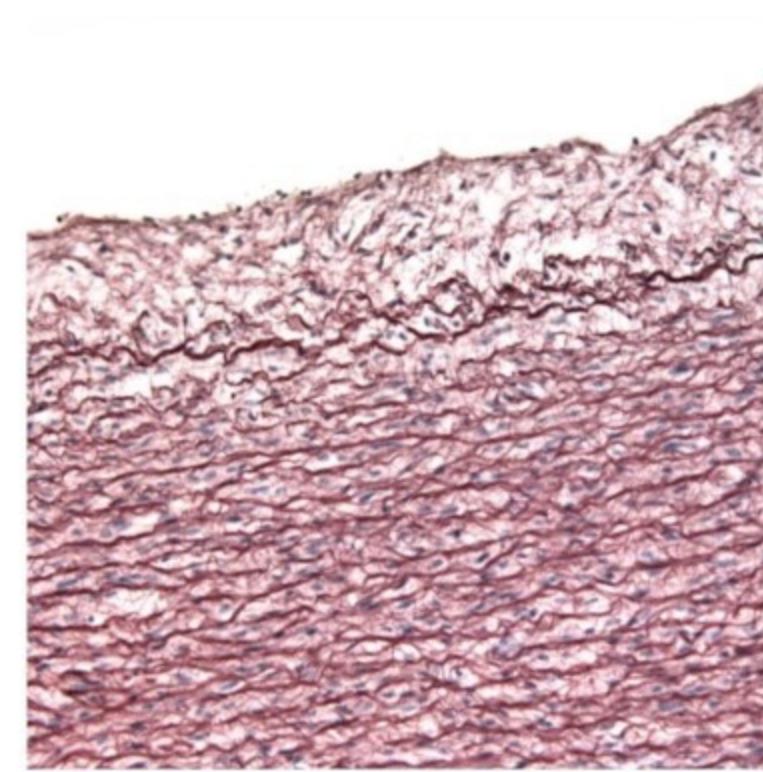

Bazofilní granulocyt

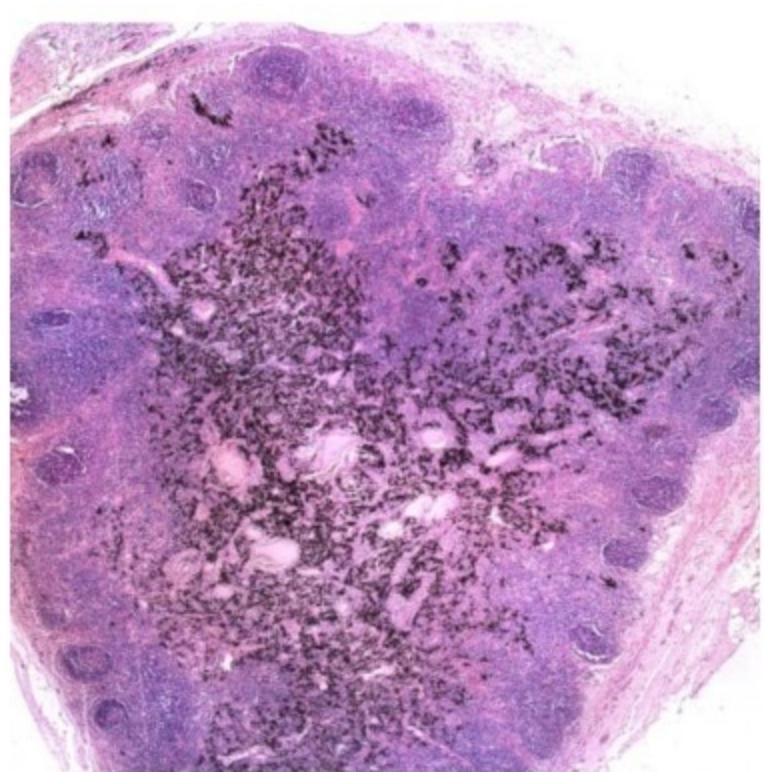

Eozinofilní granulocyt

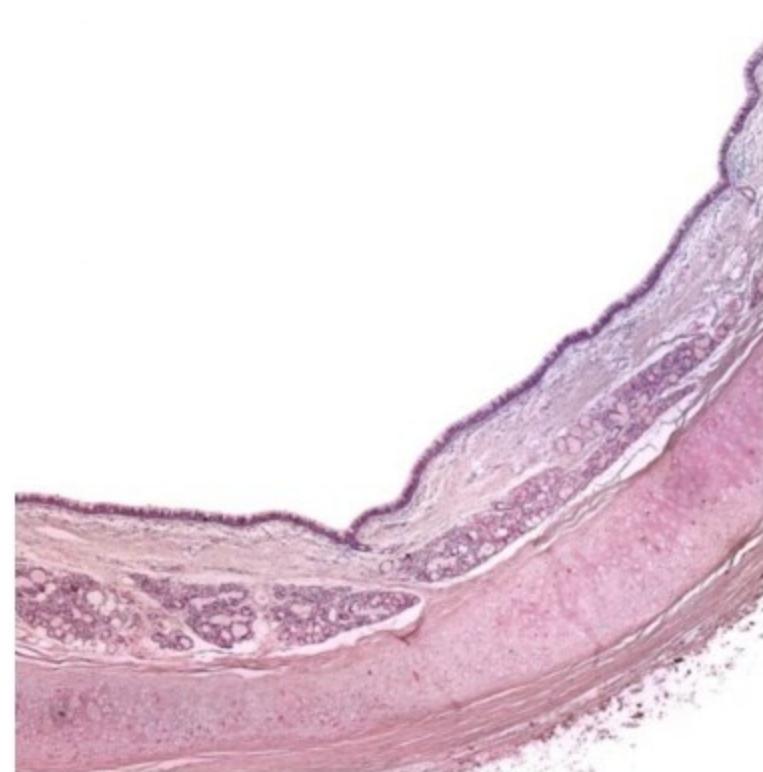

Vena cava

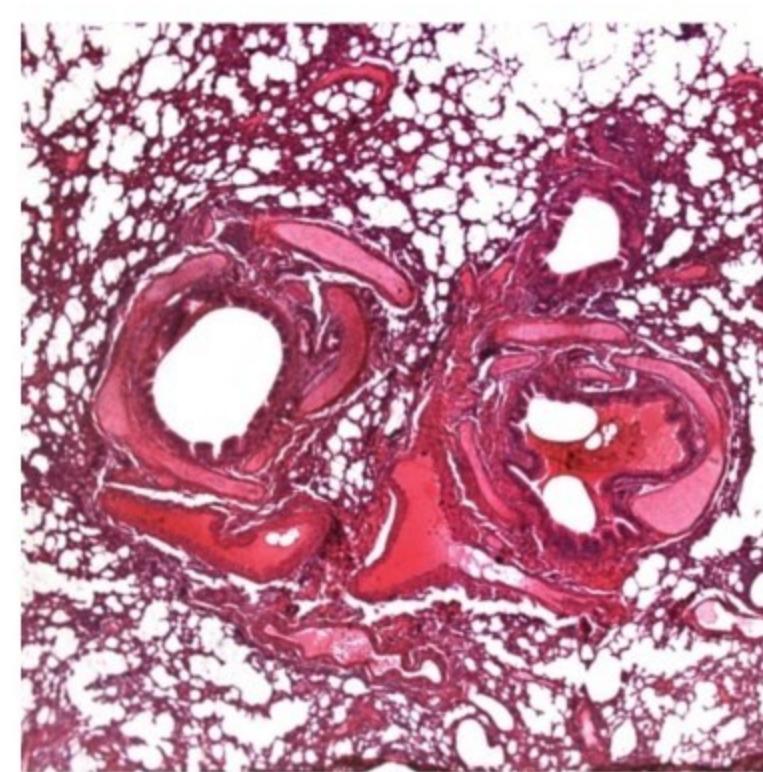

Aorta

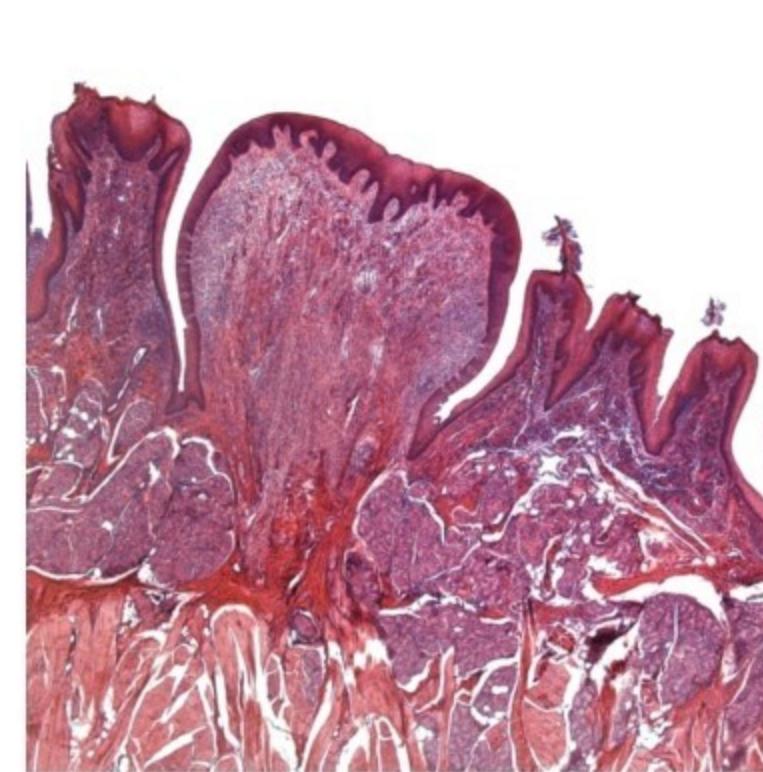

Lymphonodus

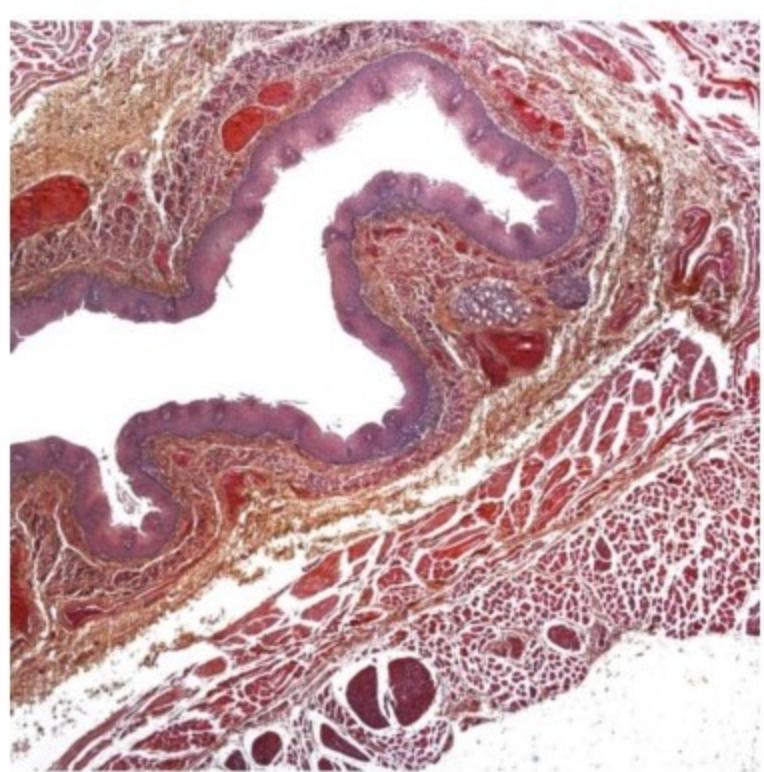

Trachea

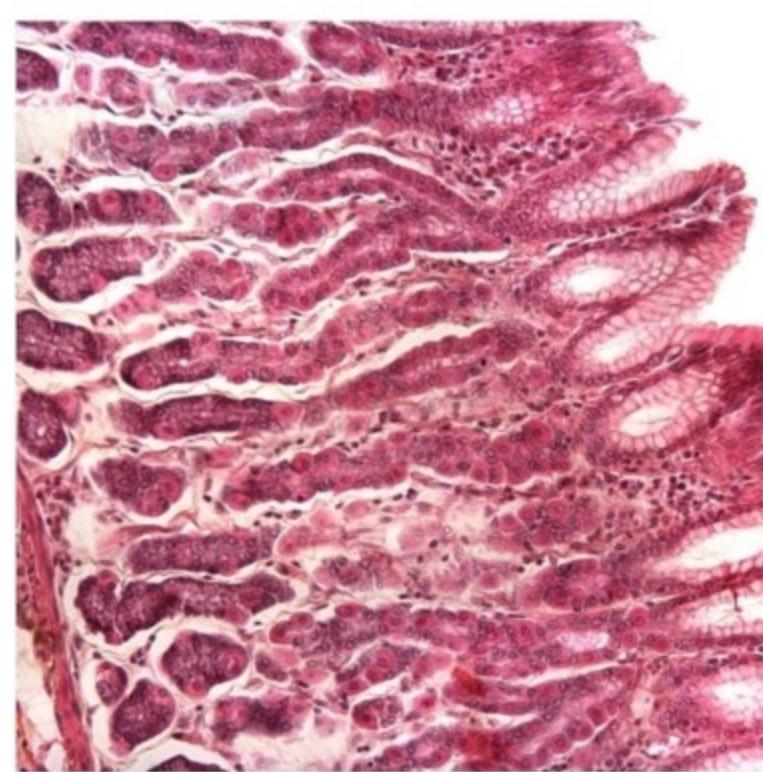

Bronchus a bronchiolus

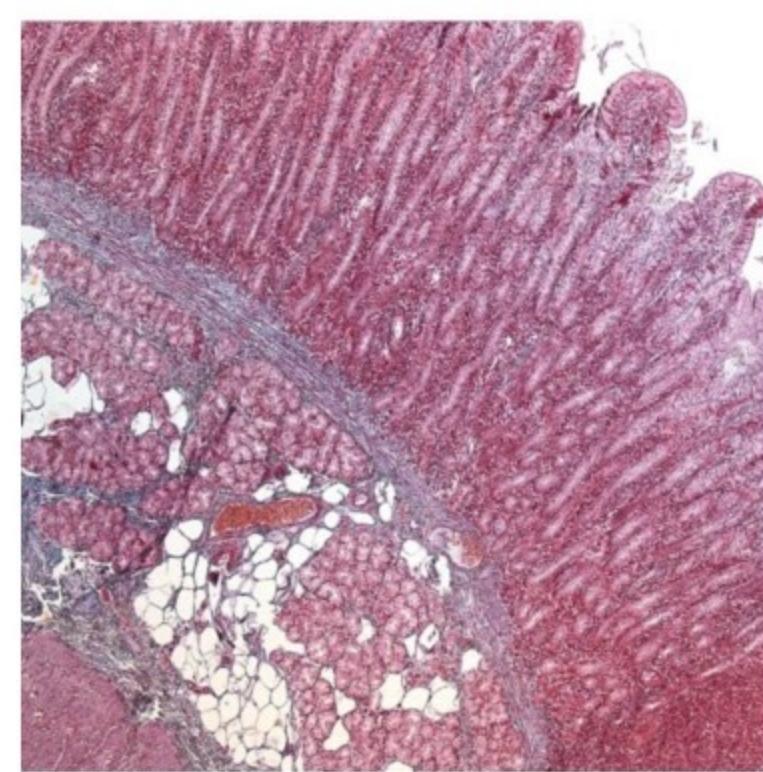

Jazykové papily

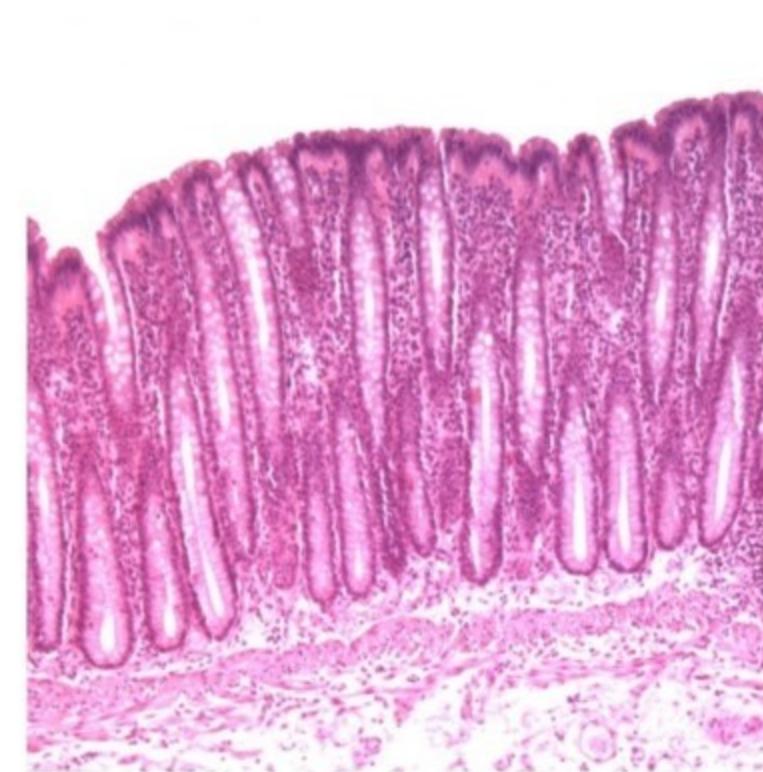

Jícen

Glandulae gastricae propriae

Duodenum

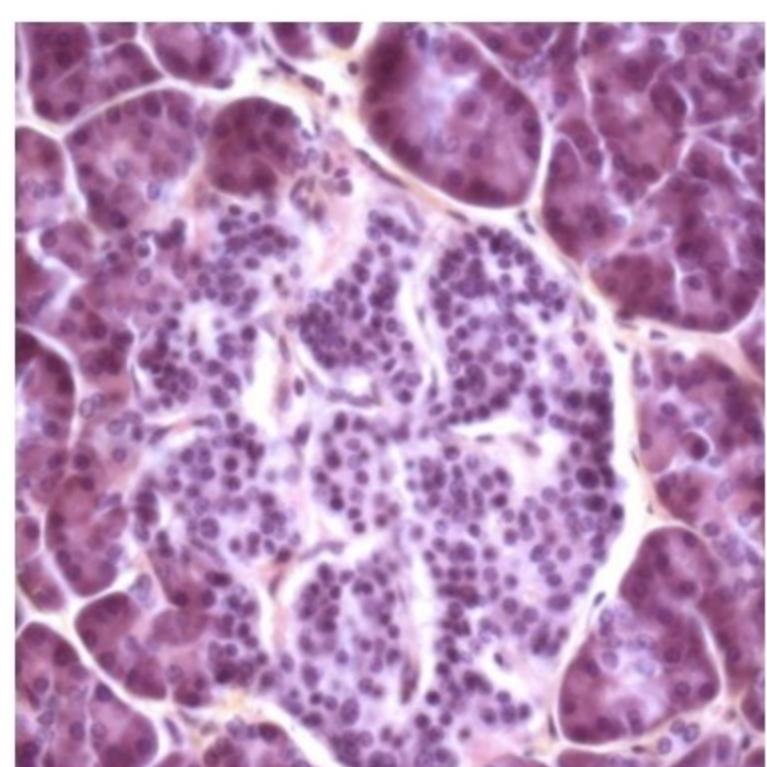

Sliznice tlustého střeva

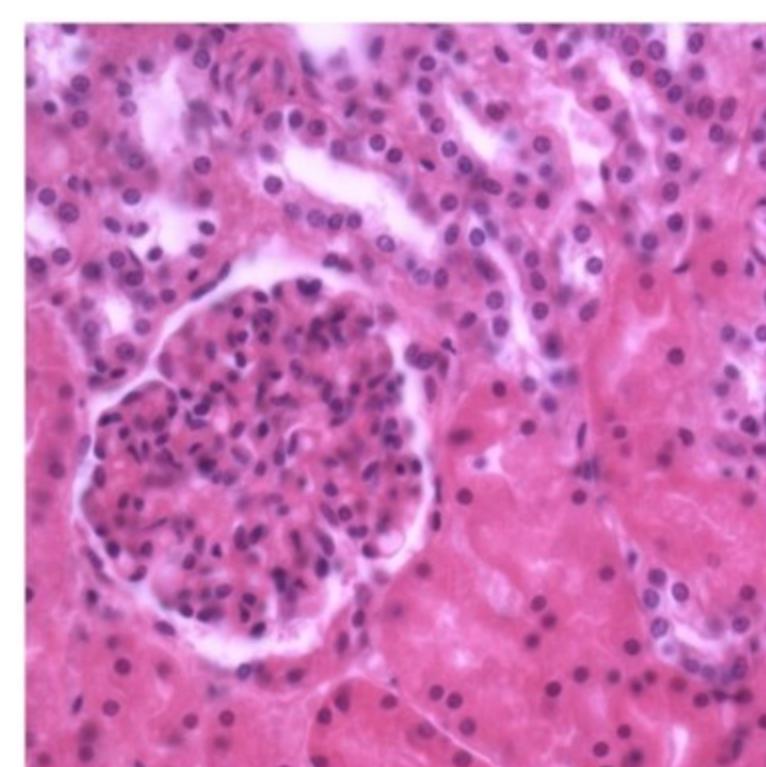

**MUNI**  
**MED** Ústav  
histologie  
a embryologie

Appendix vermiciformis

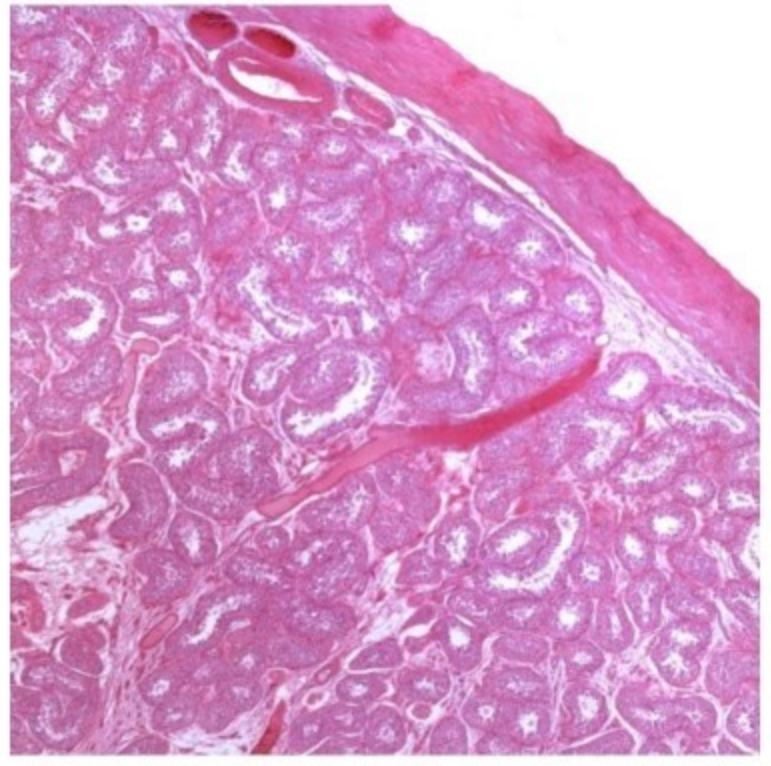

Langerhansův ostrůvek v pankreatu

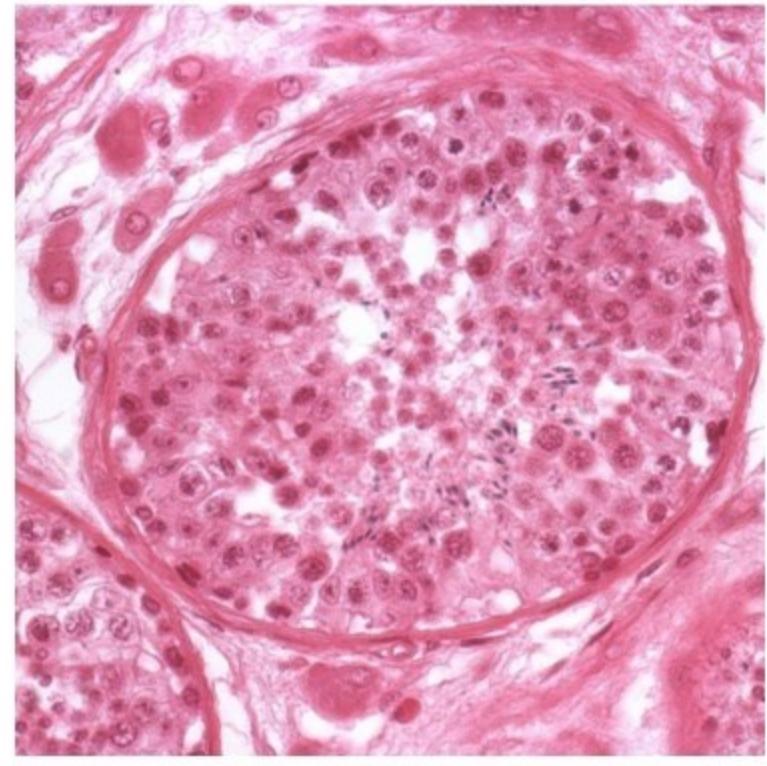

Corpusculum renis

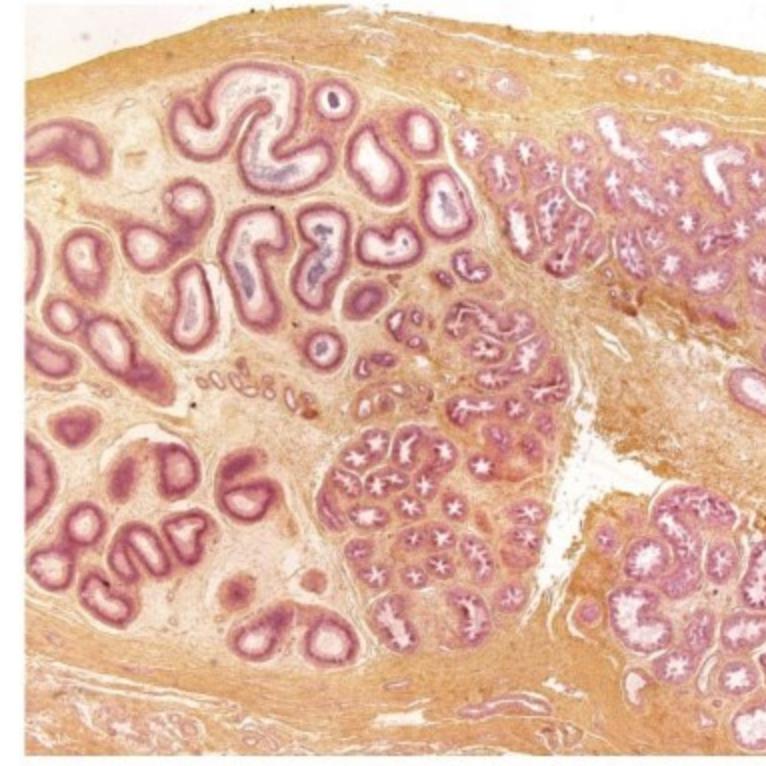

Ureter

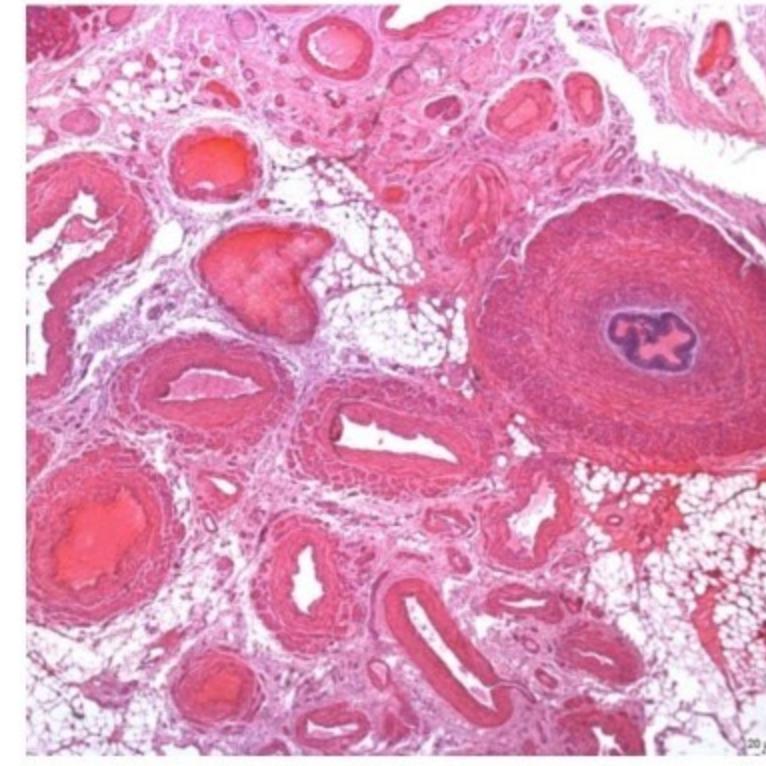

Testis

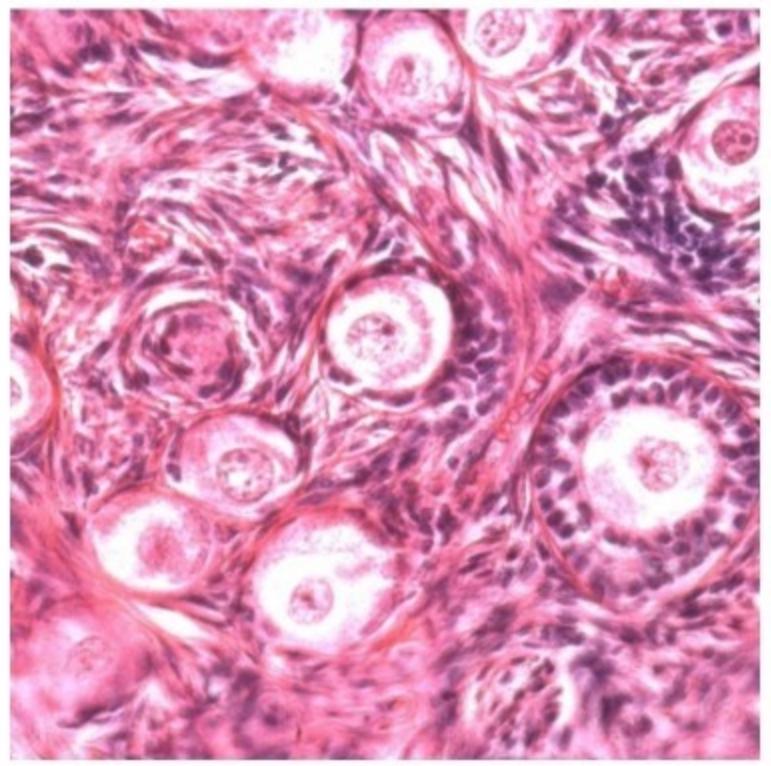

Tubuli seminiferi contorti

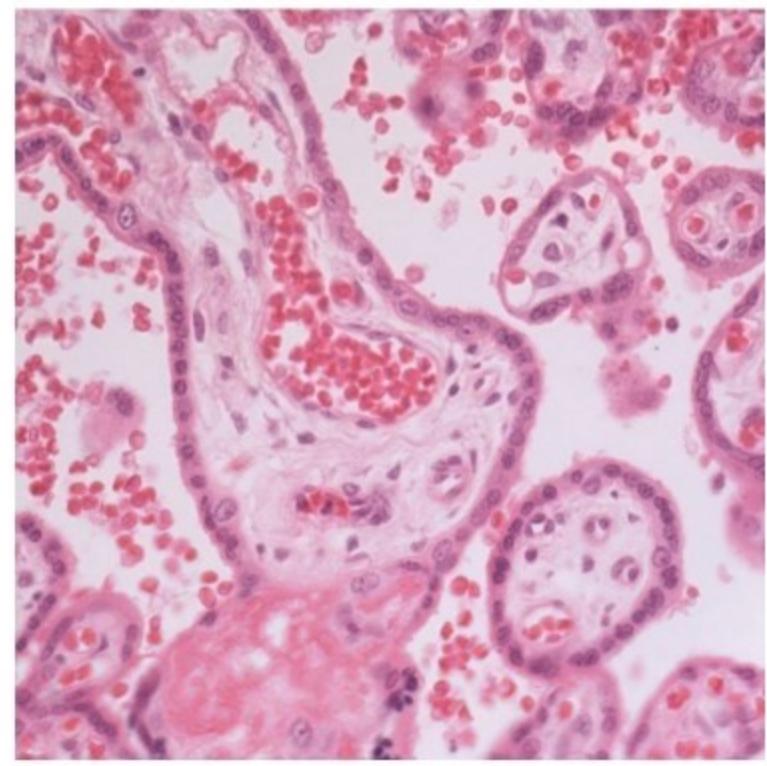

Epididymis

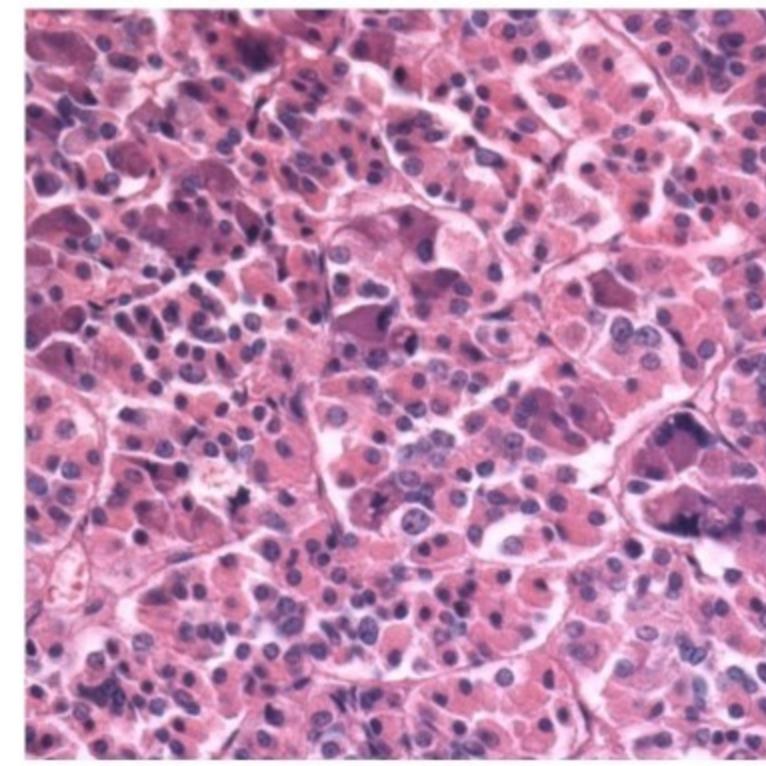

Funiculus spermaticus

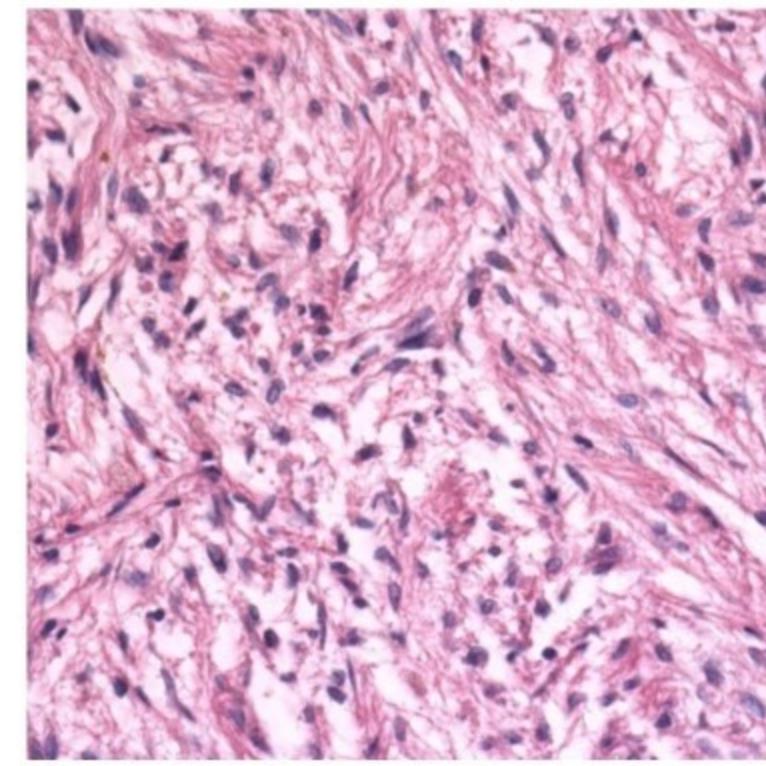

Ovariální kůra s folikuly

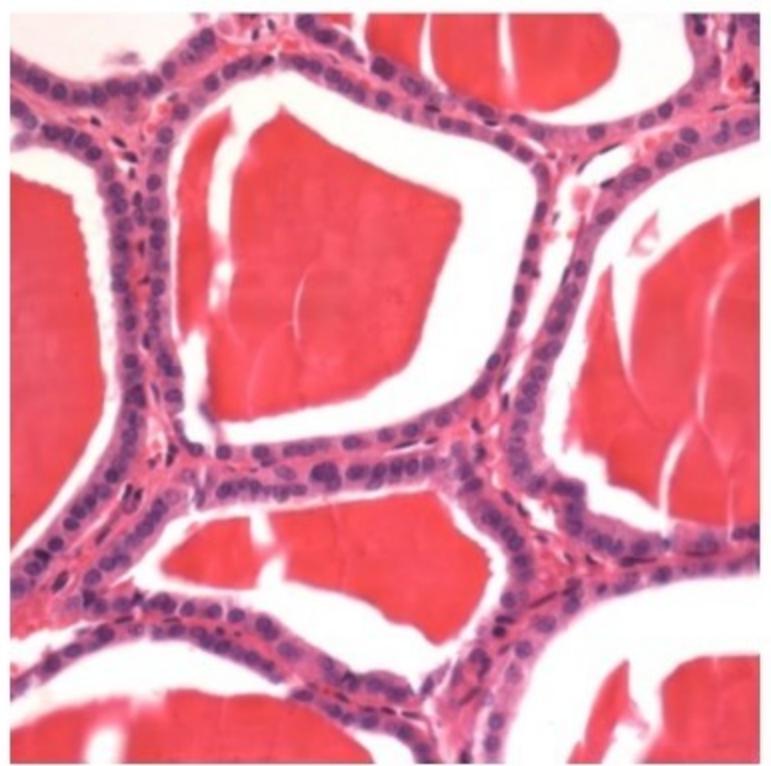

Placenta

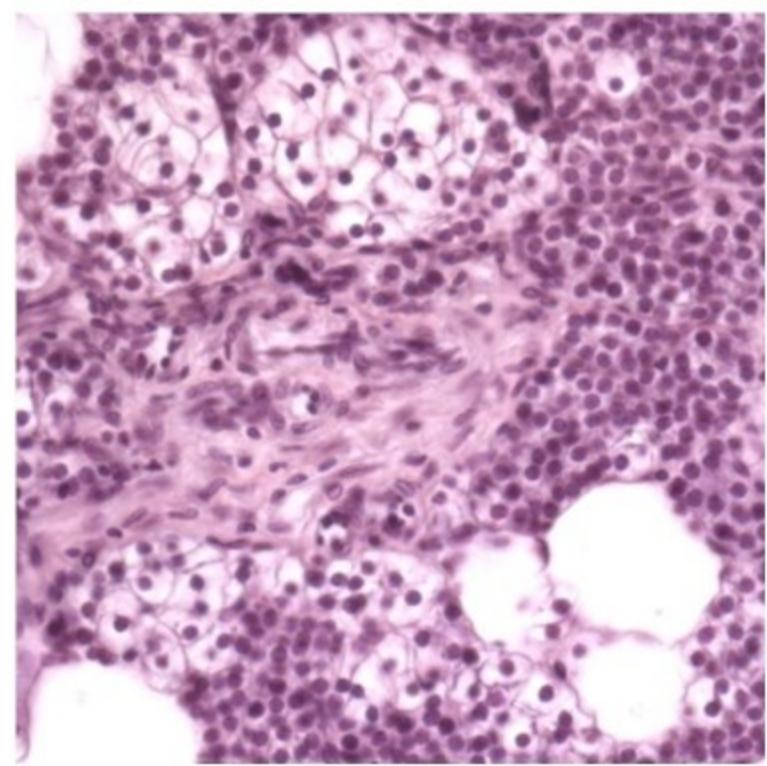

Adenohypofýza

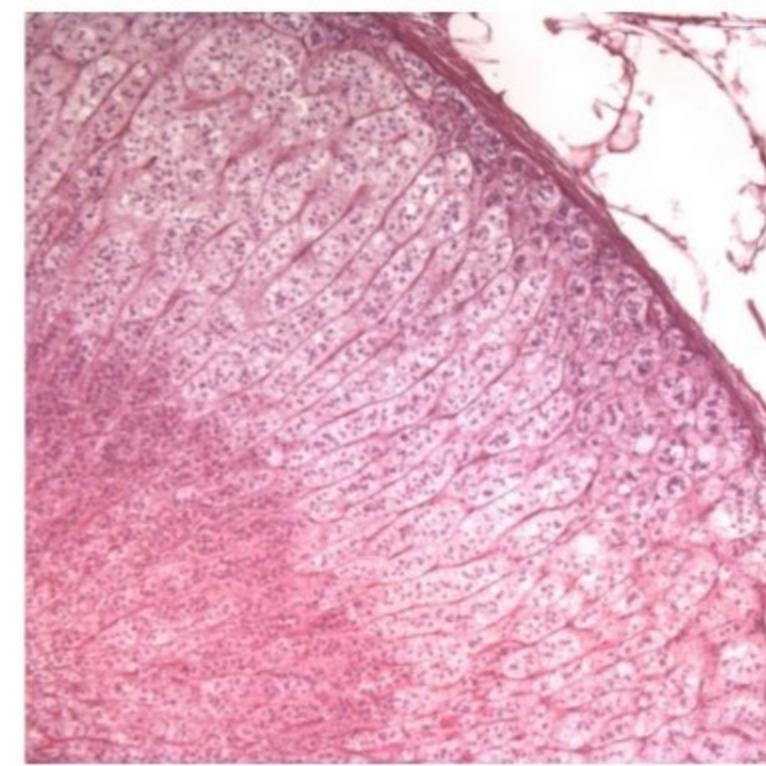

Neurohypofýza

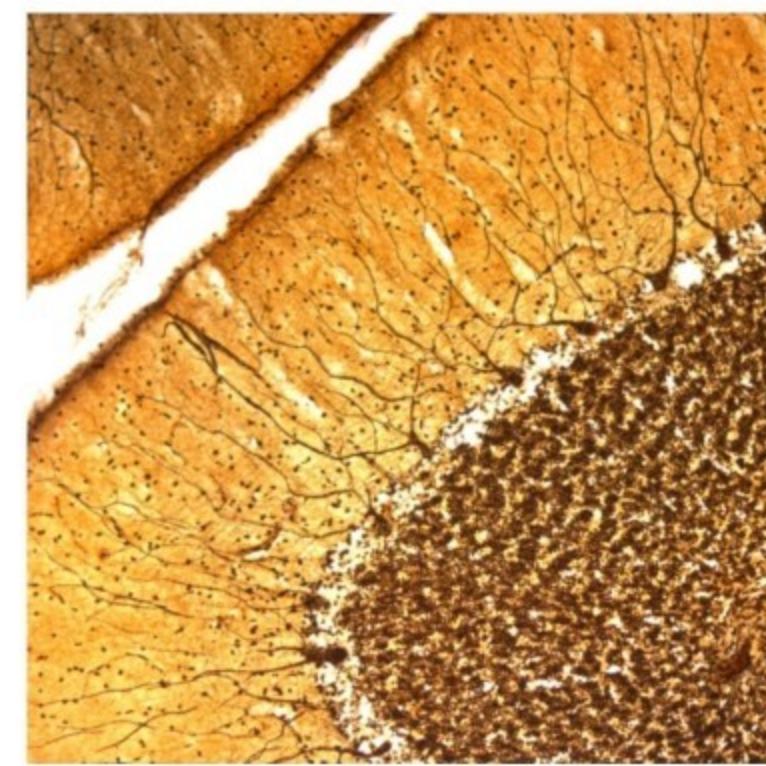

Glandula thyroidea

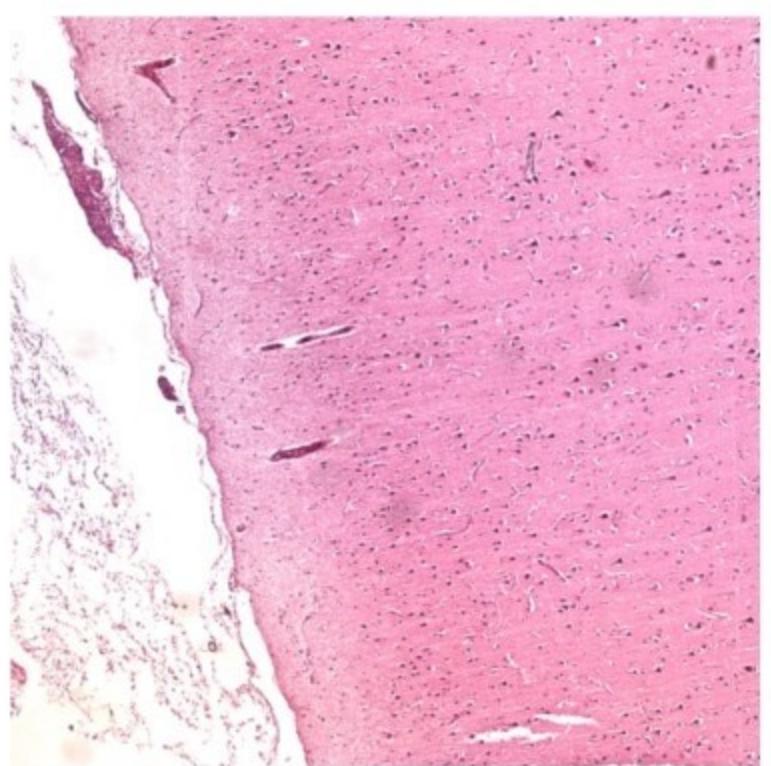

Glandula parathyroidea

Kůra nadledviny

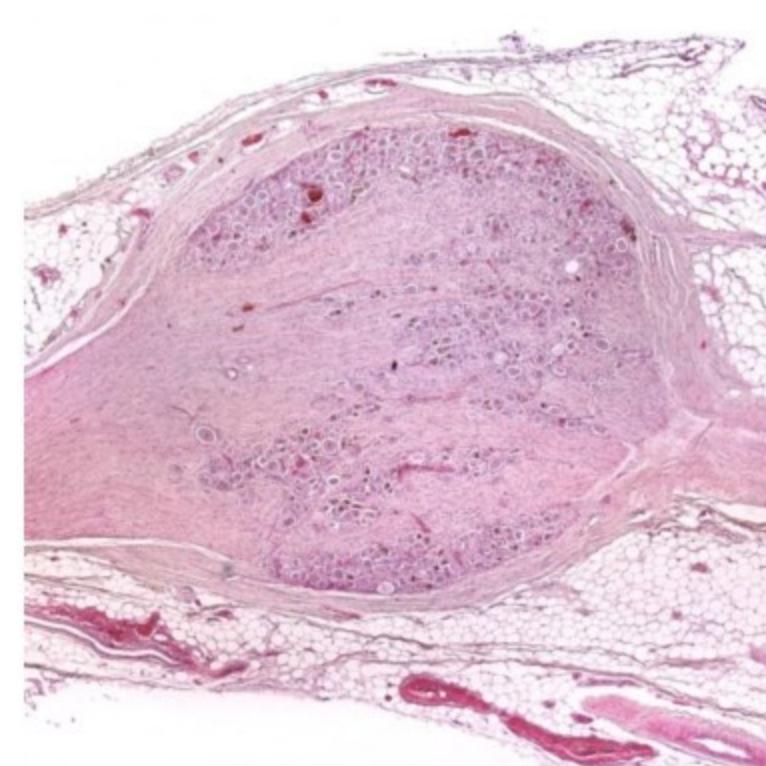

Mozeček

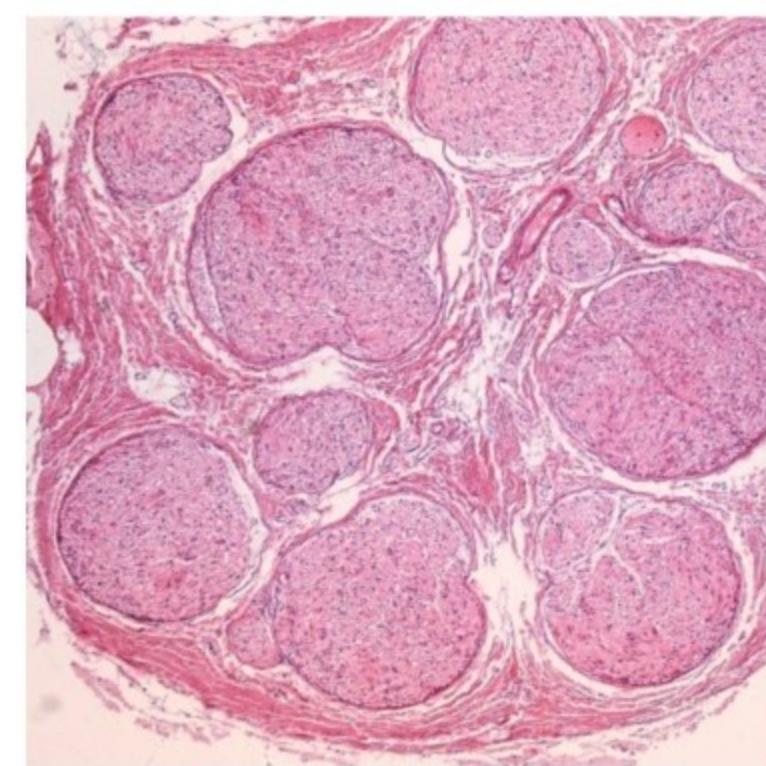

Mozková kůra

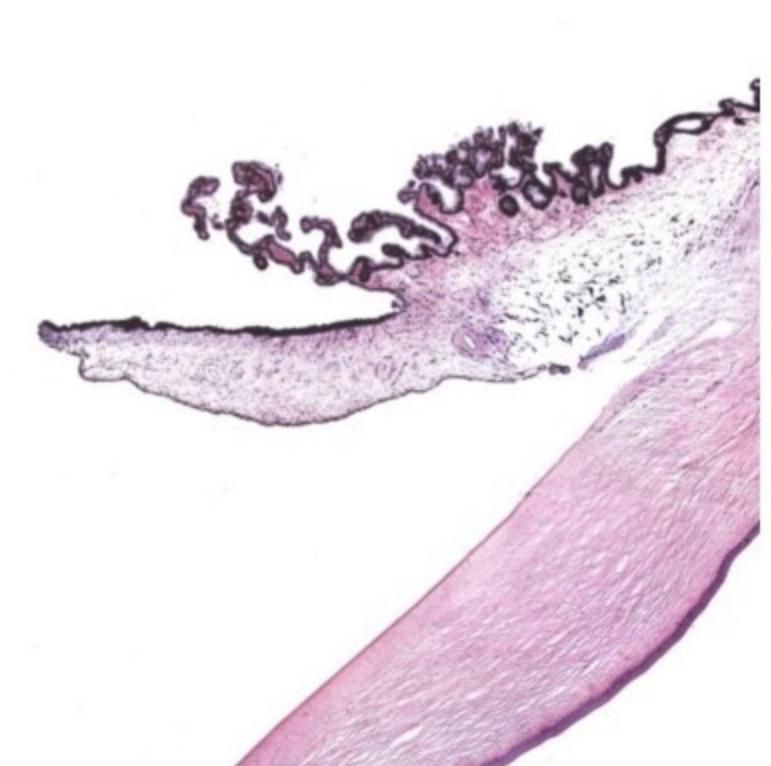

Mícha

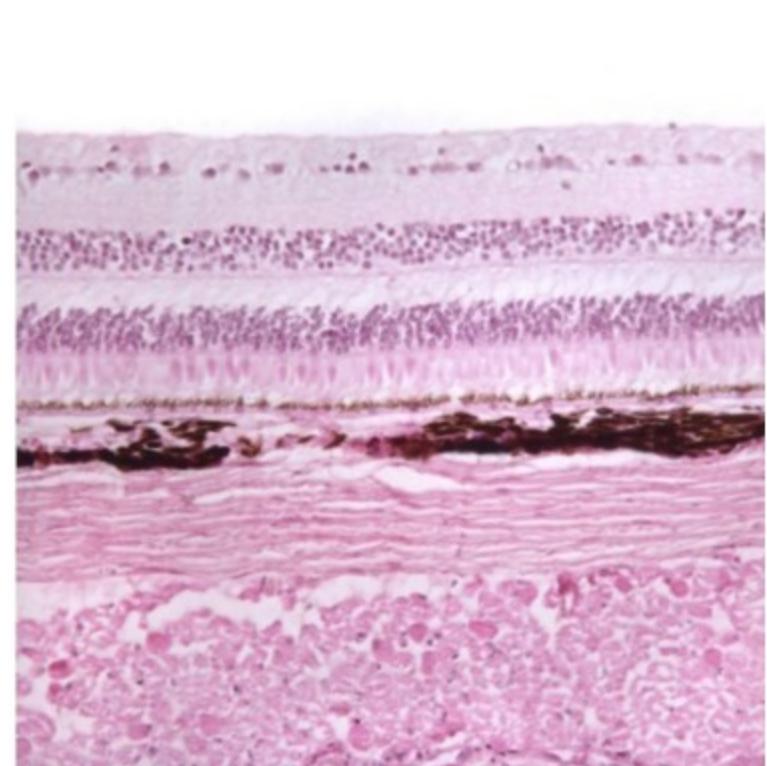

Ganglion spinalis

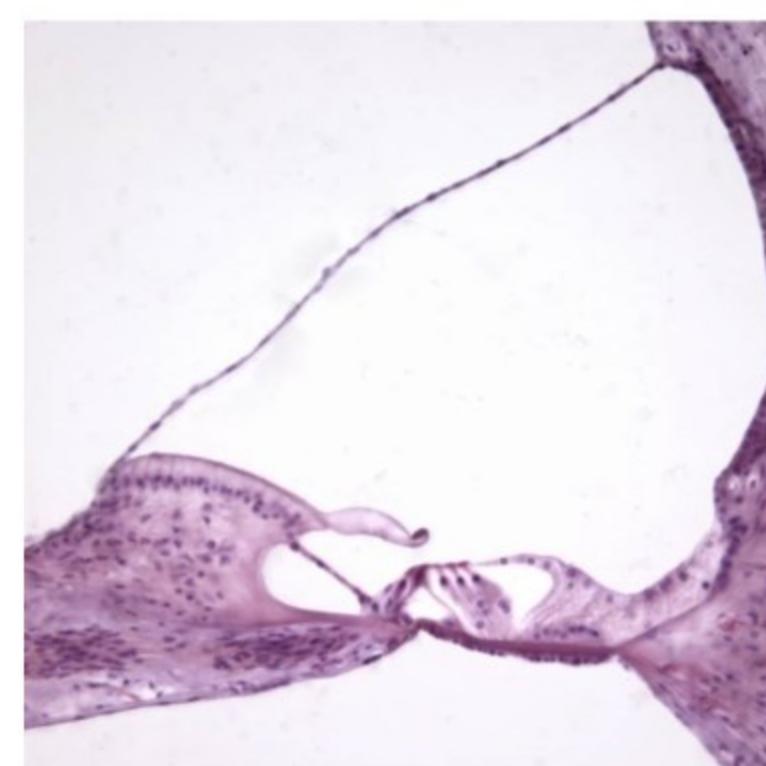

Periferní nerv

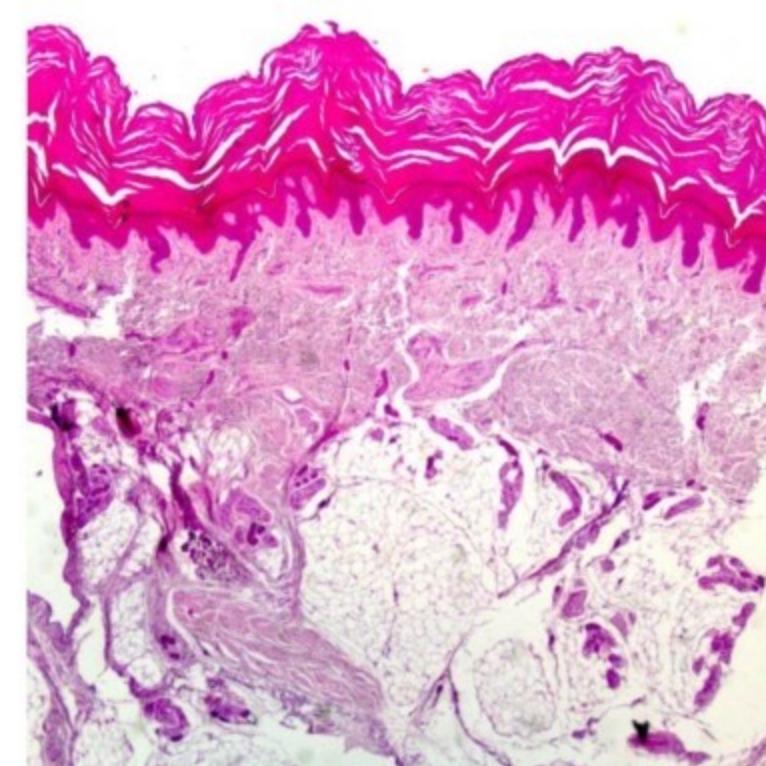

Přední segment oční

Zadní segment oční

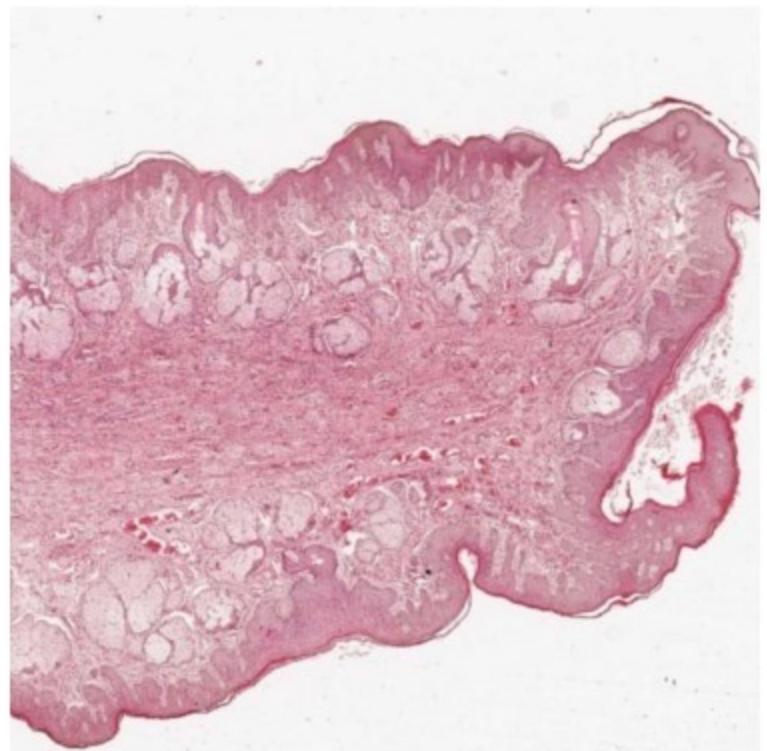

Vnitřní ucho

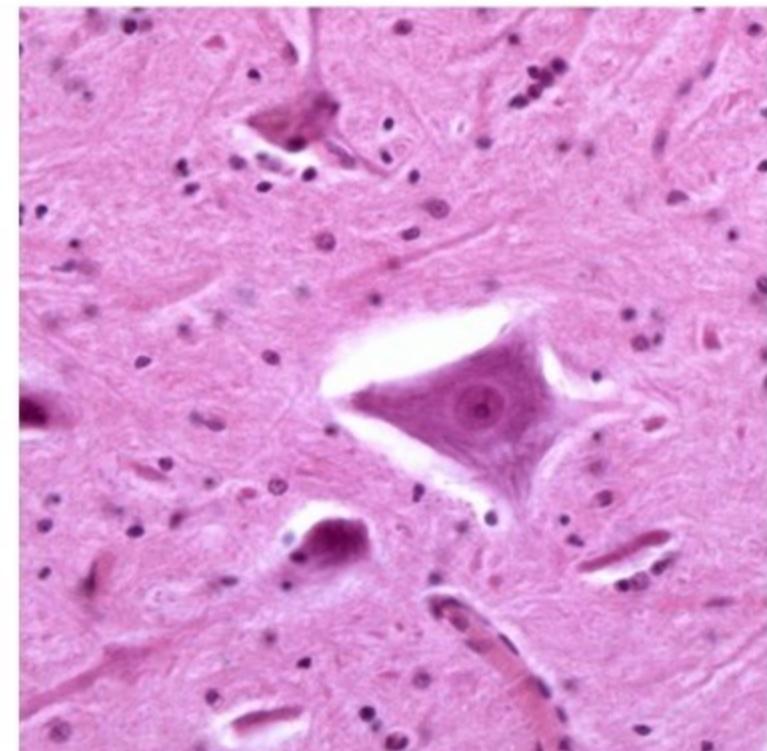

Kuže z bříška prstu

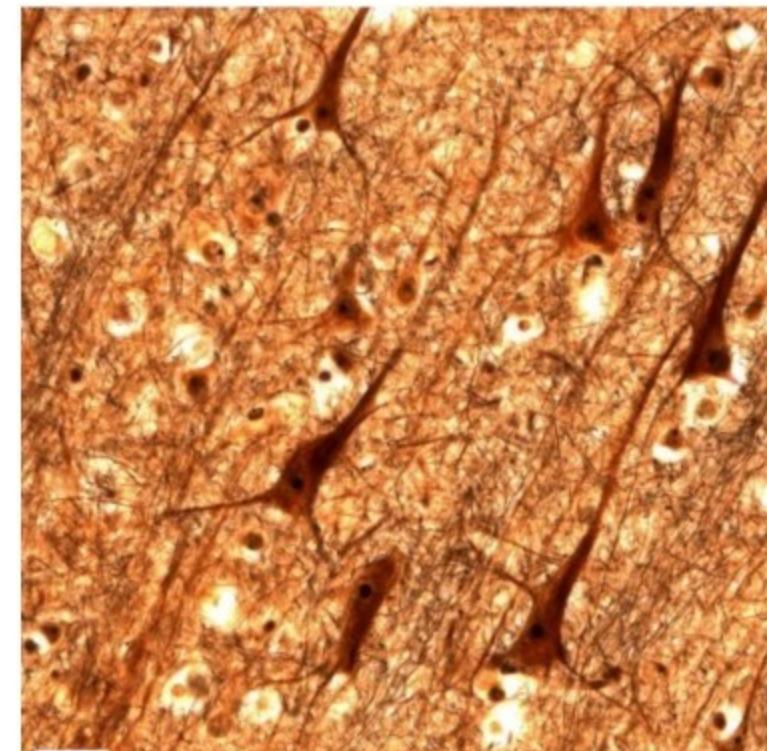

**MUNI**  
**MED** Ústav  
histologie  
a embryologie

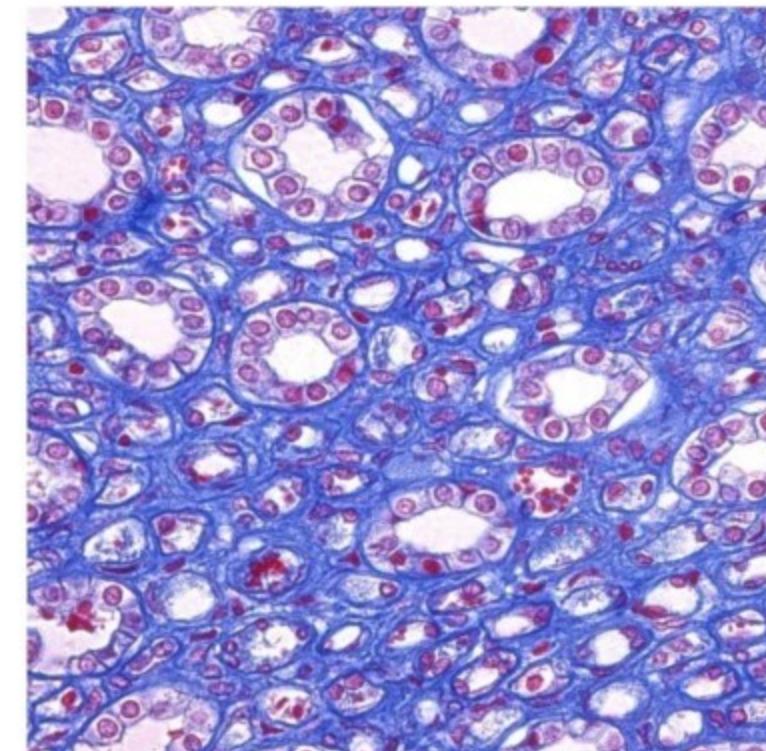

Labium minus

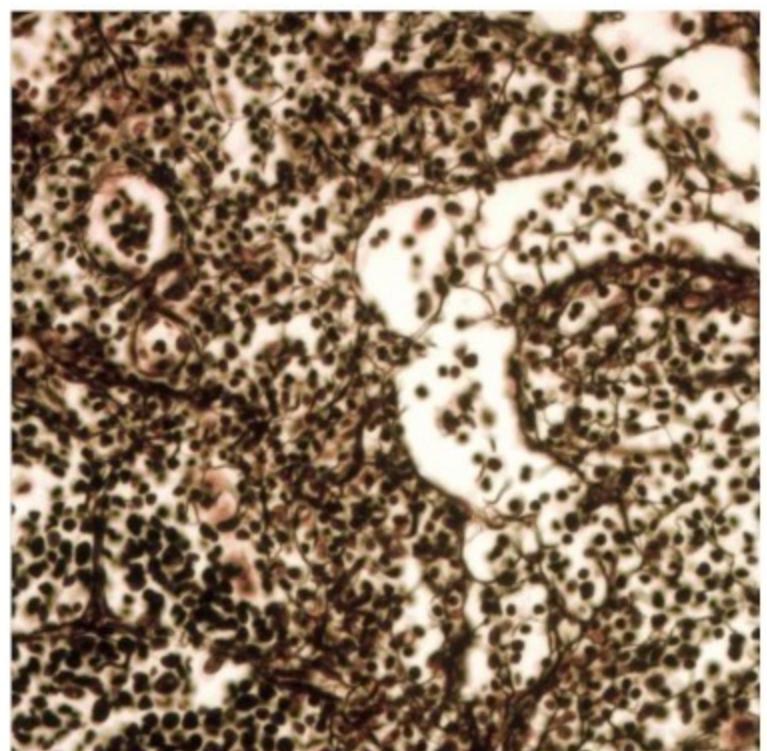

Míšní neurony

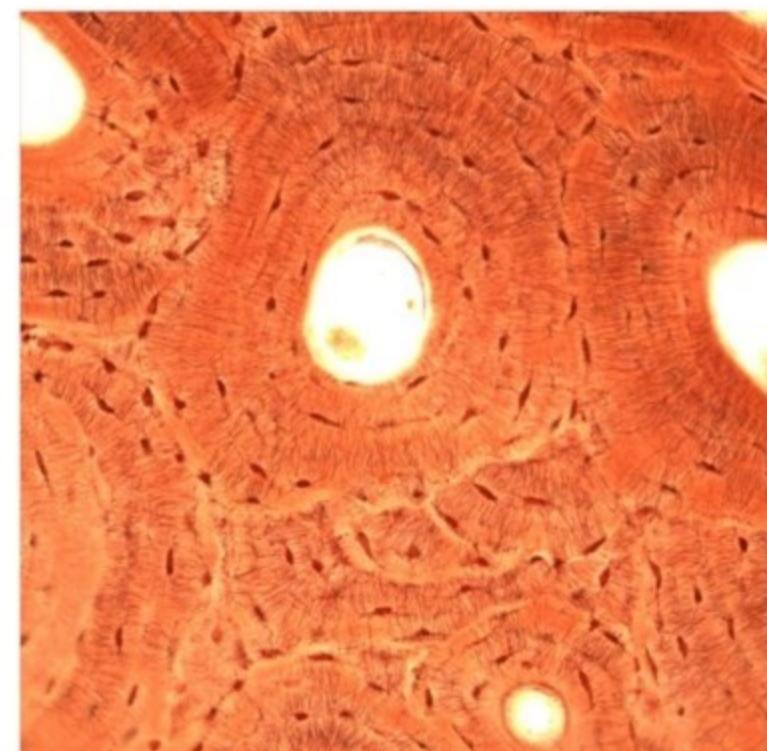

Neurony mozkové kůry

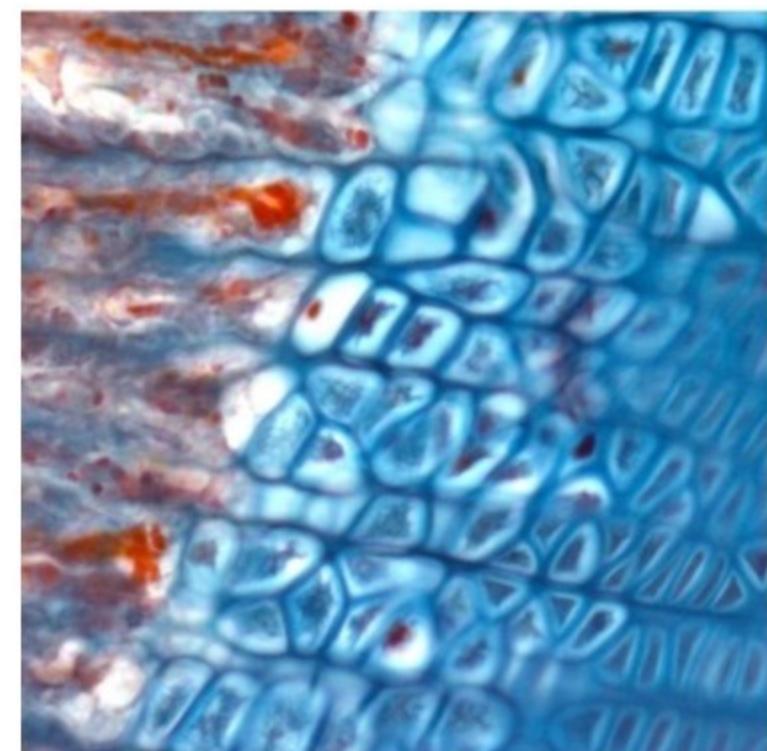

Dřeň ledviny

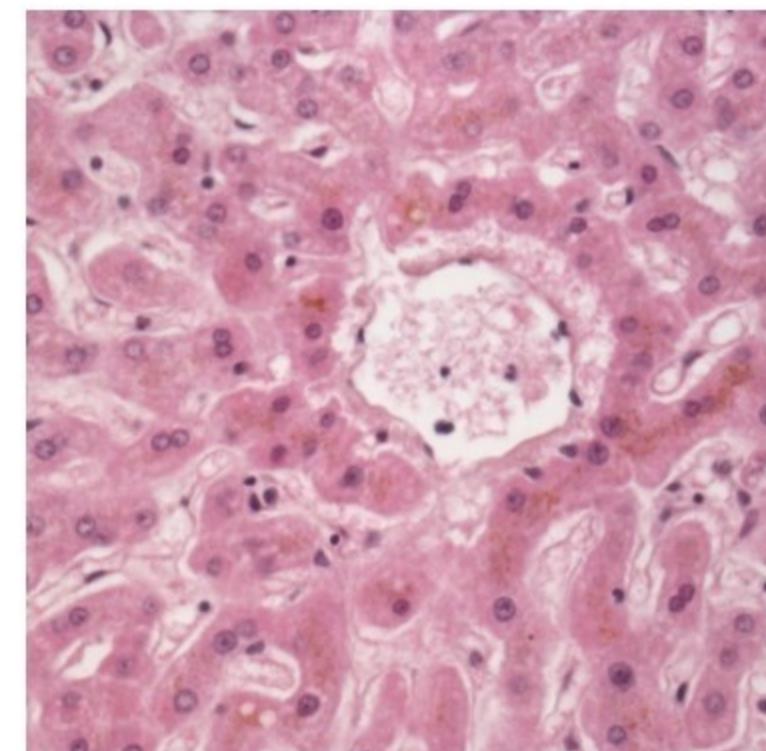

Retikulární vlákna sleziny

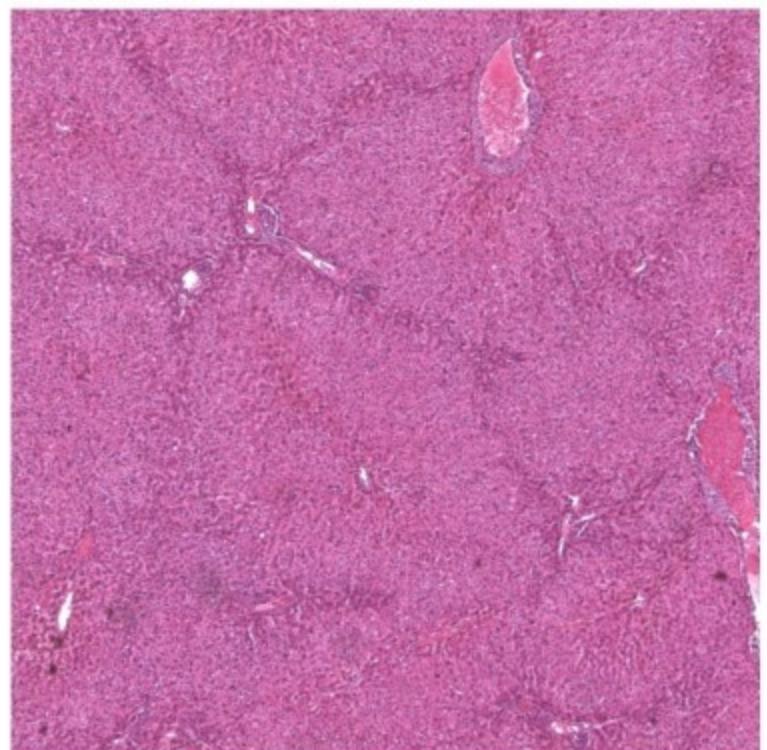

Kost

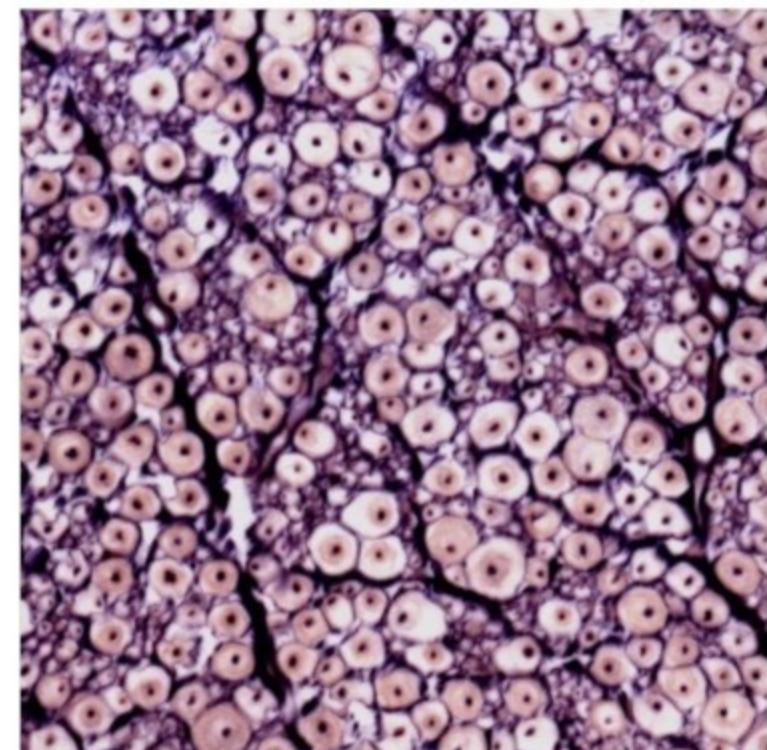

Růstová ploténka

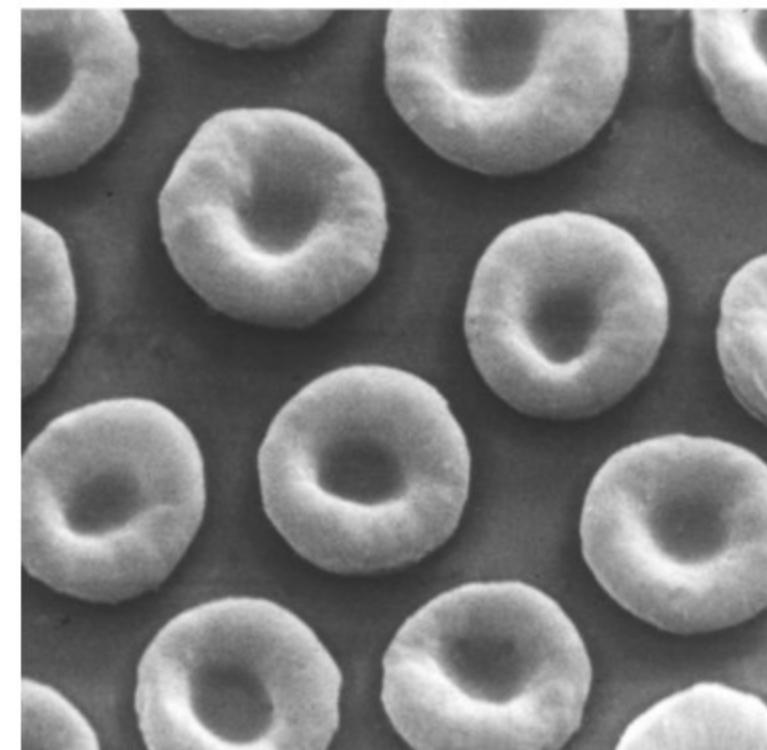

Vena centralis (játra)

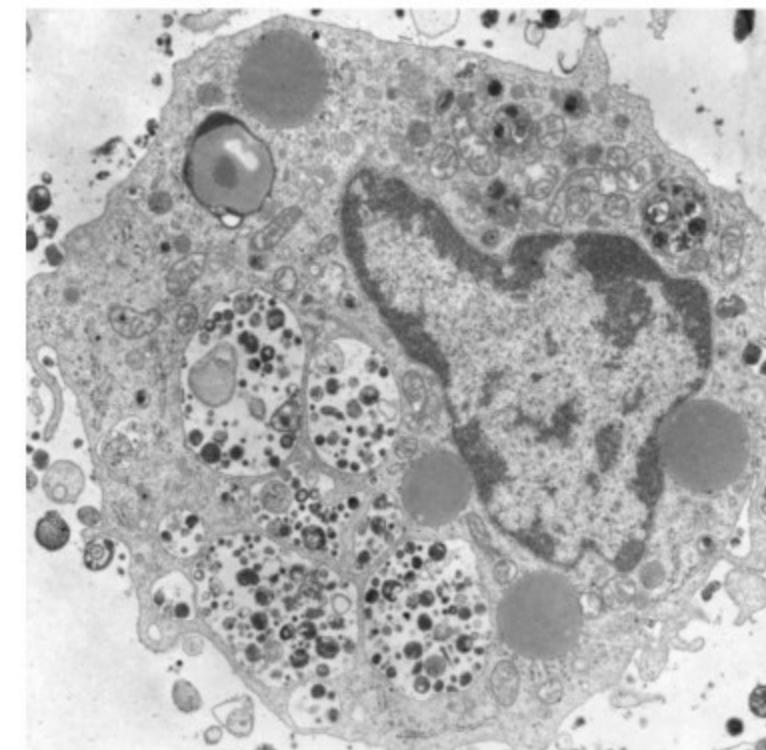

Játra

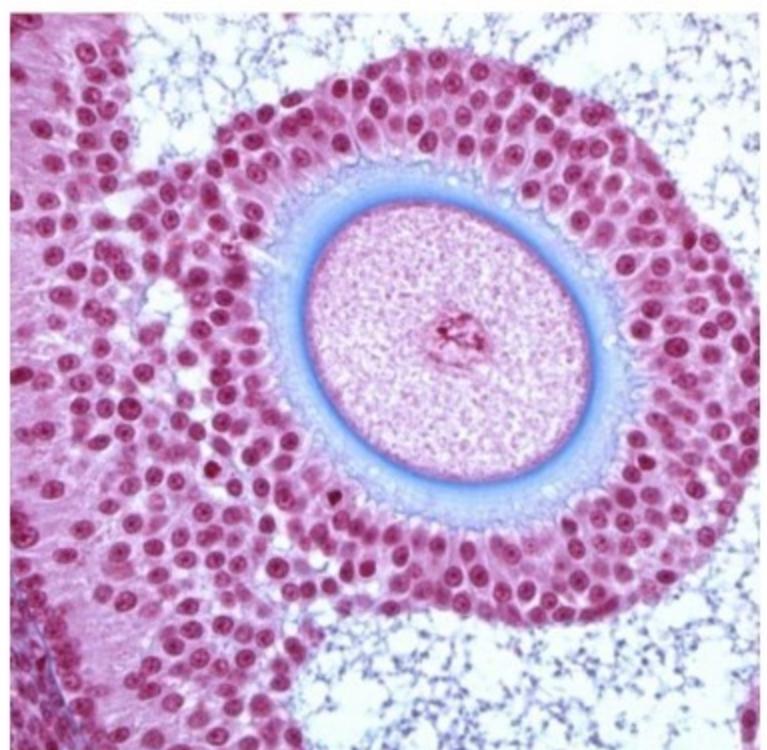

Myelinizované axony

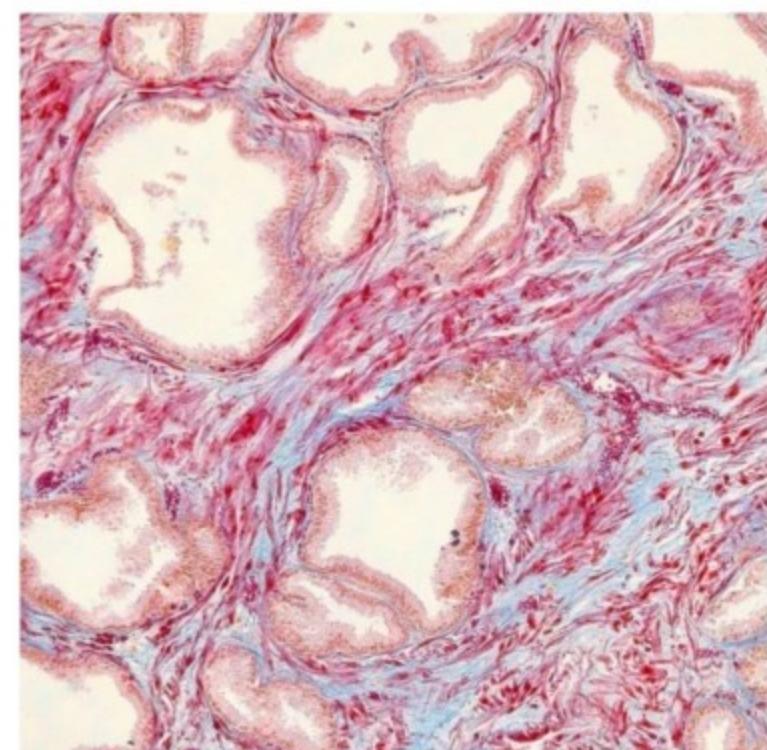

Erytrocyty

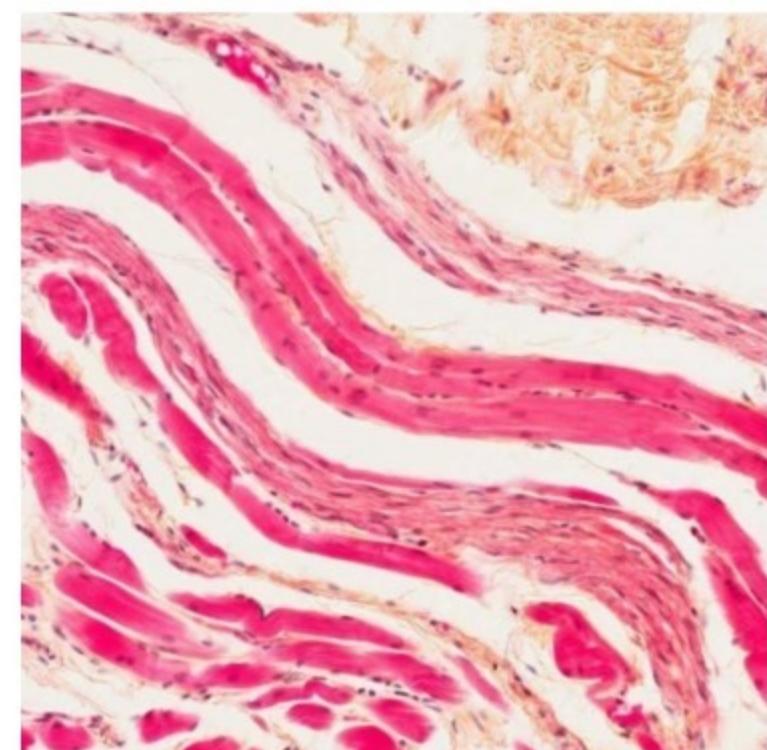

Makrofág

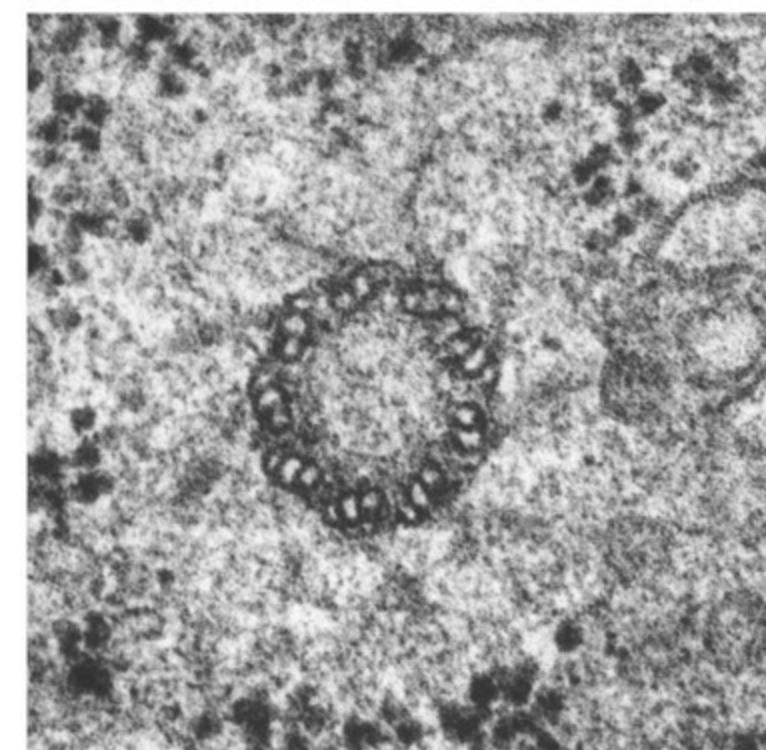

Oocyt v cumulus oophorus

Prostata

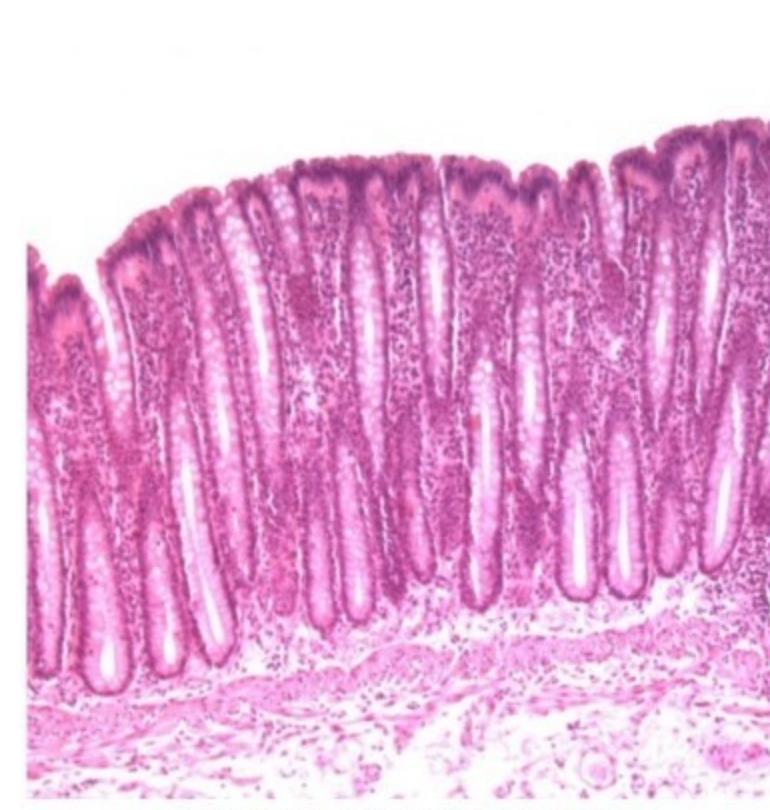

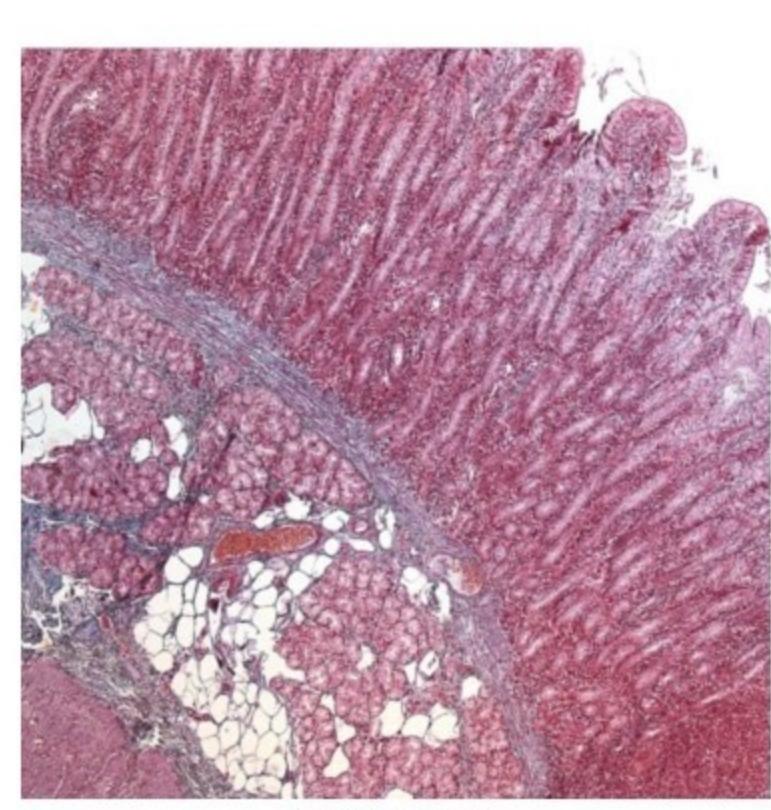

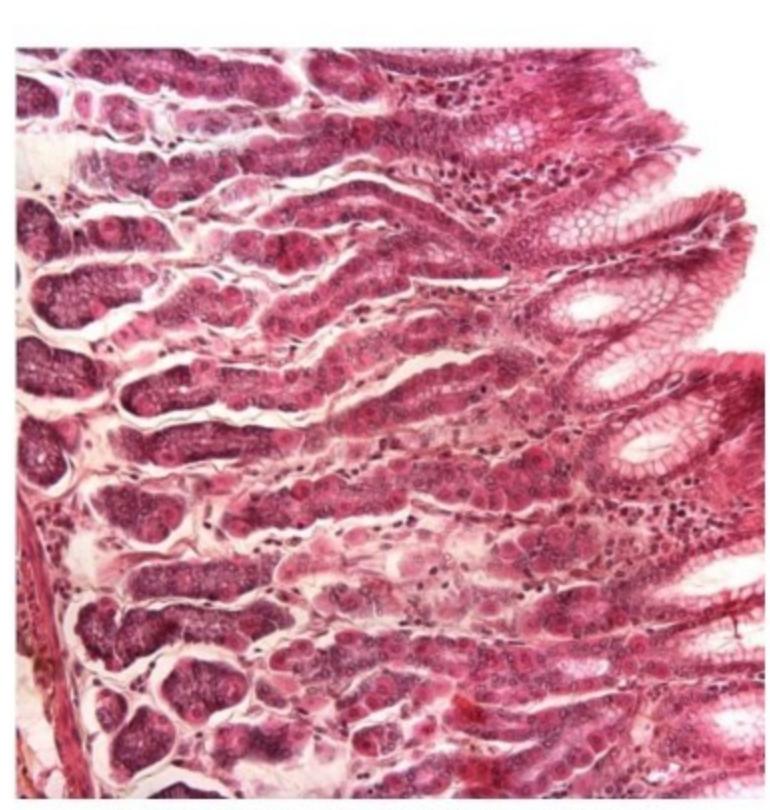

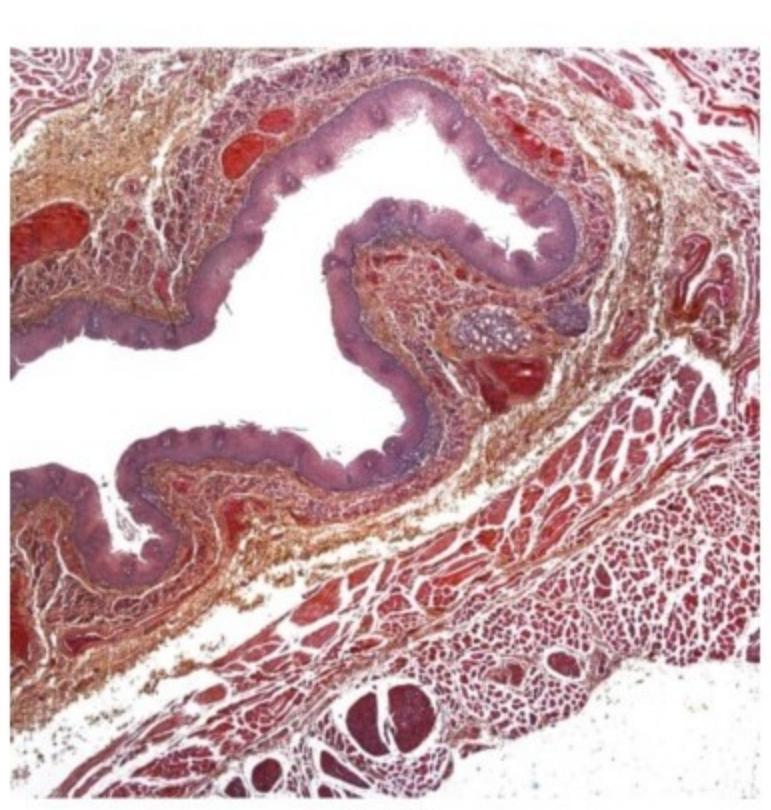

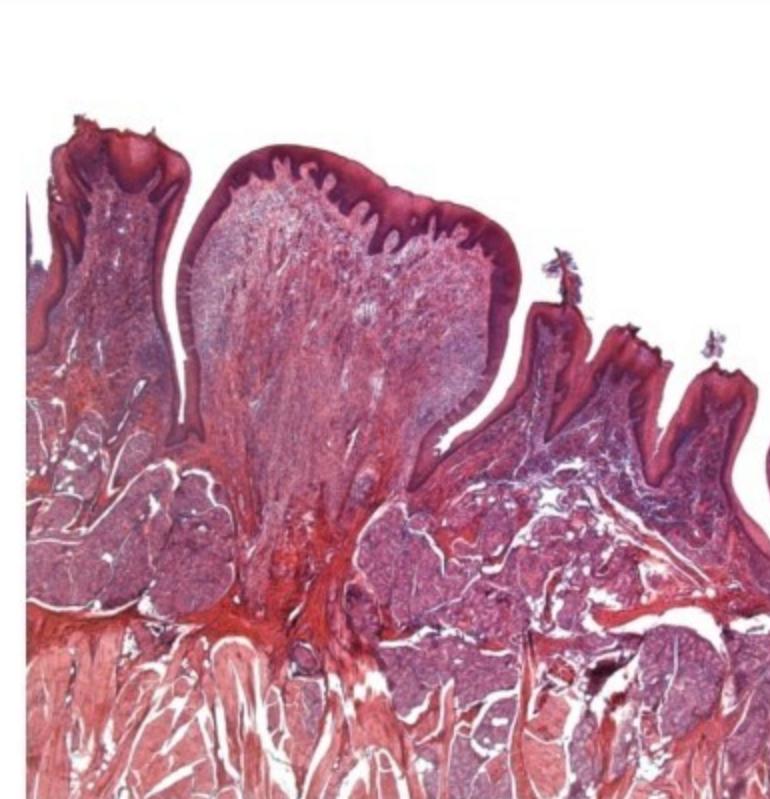

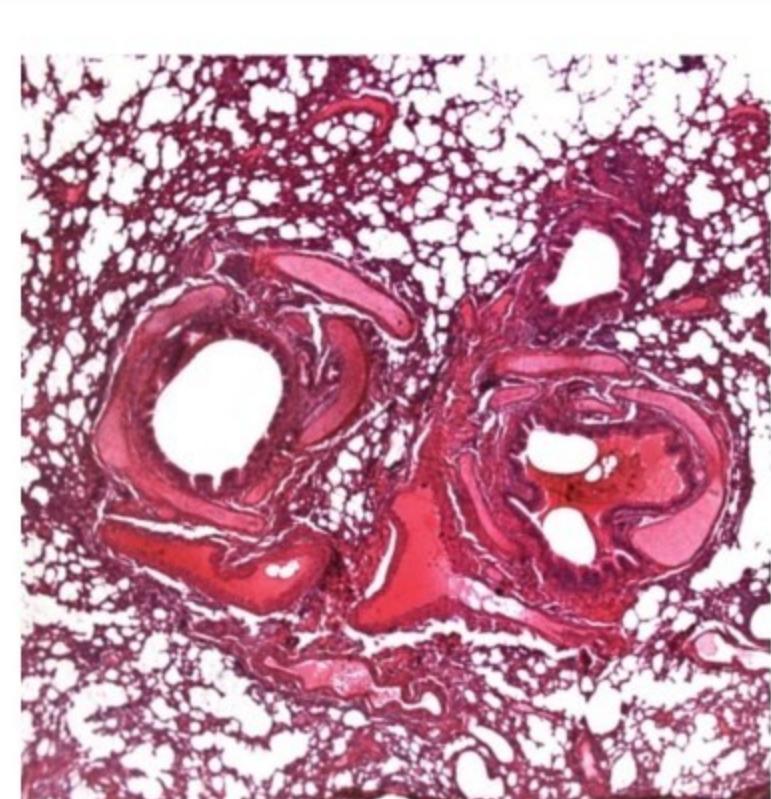

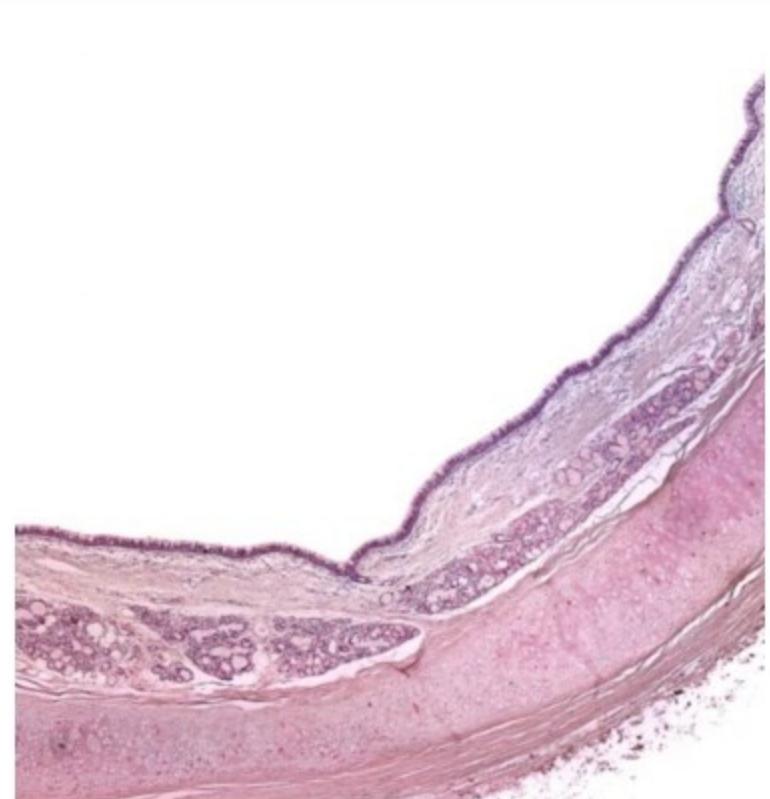

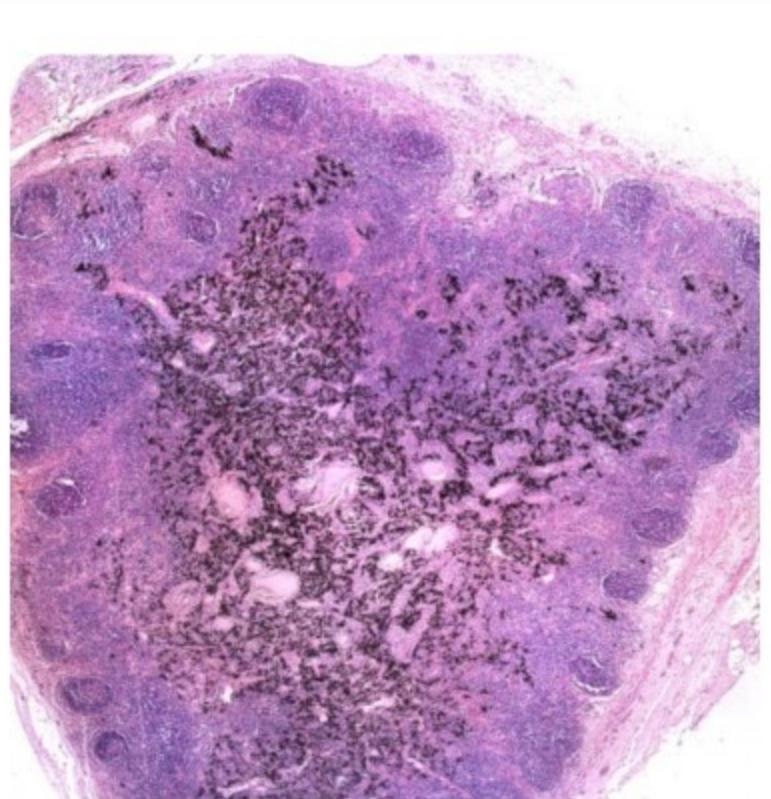

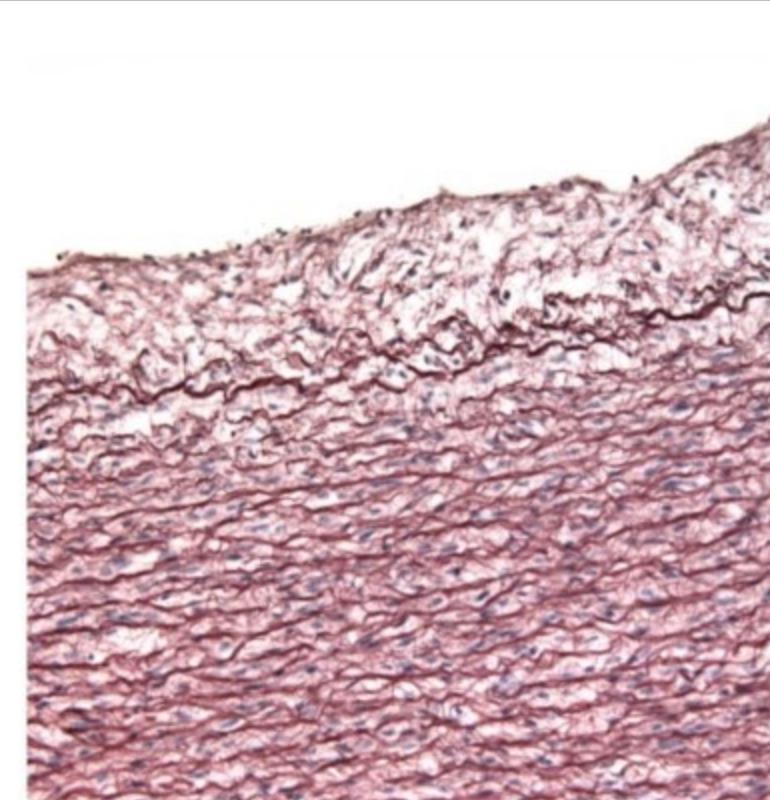

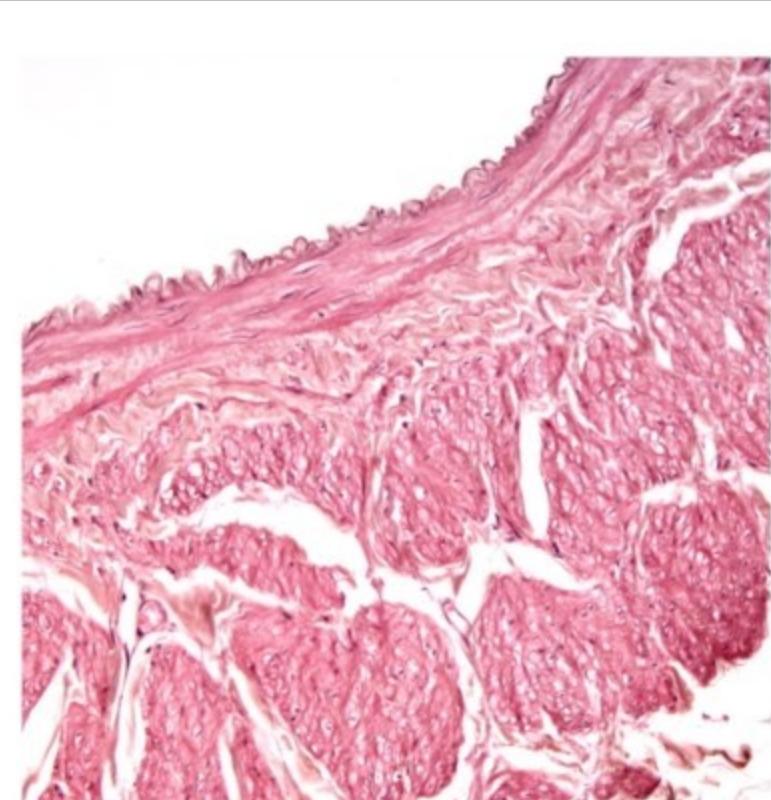

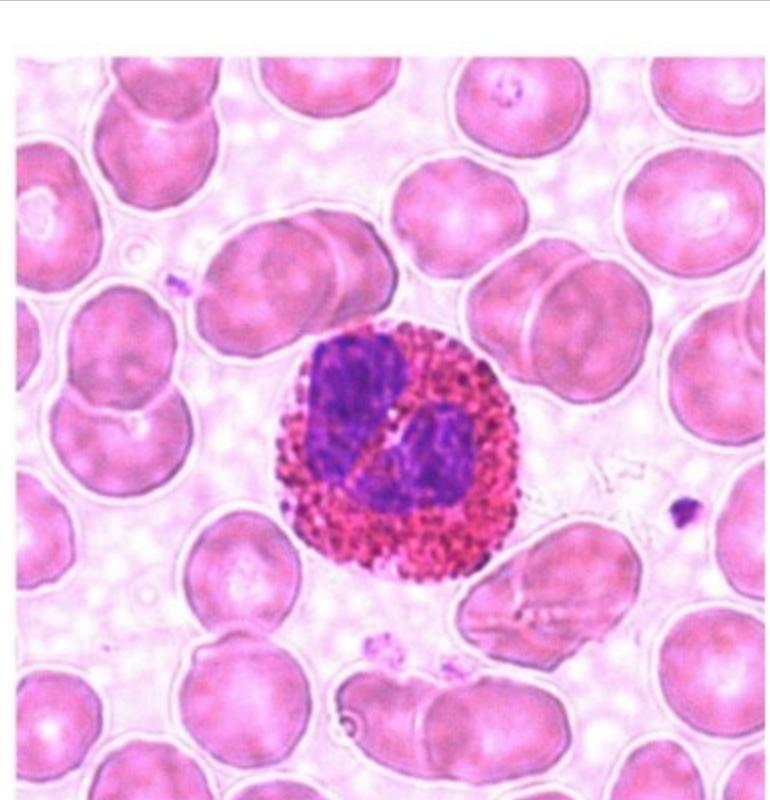

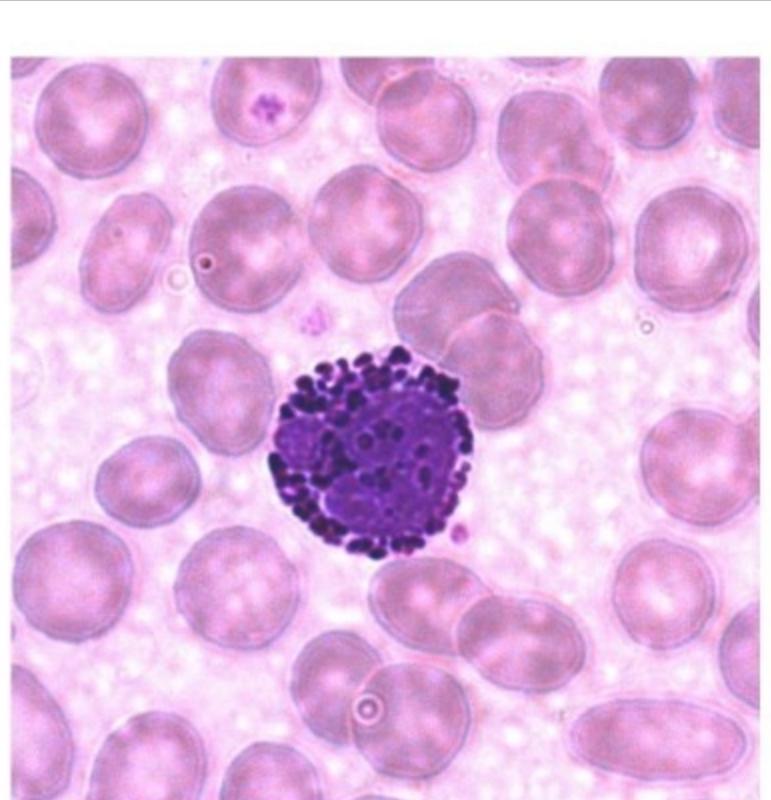

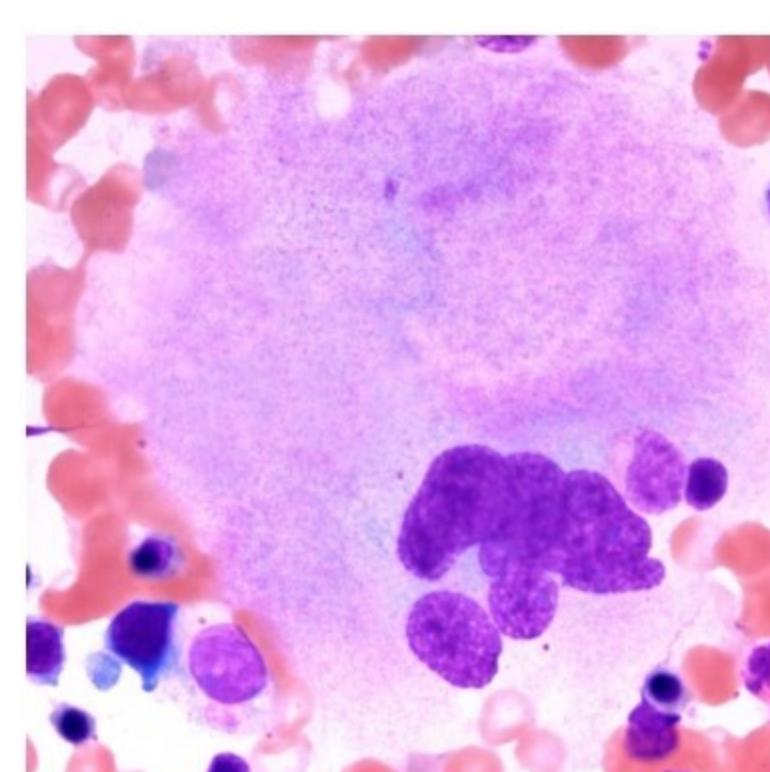

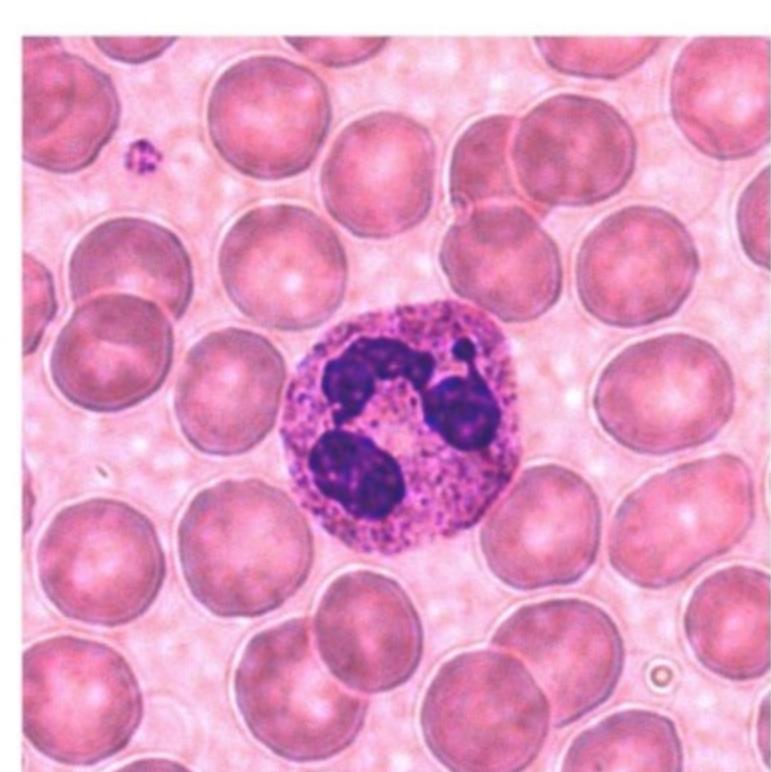

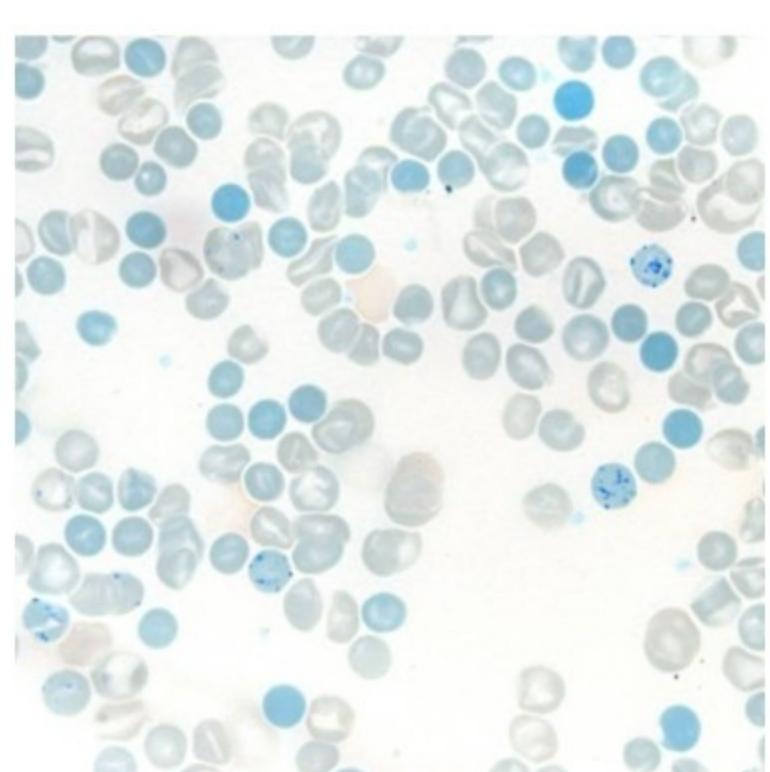

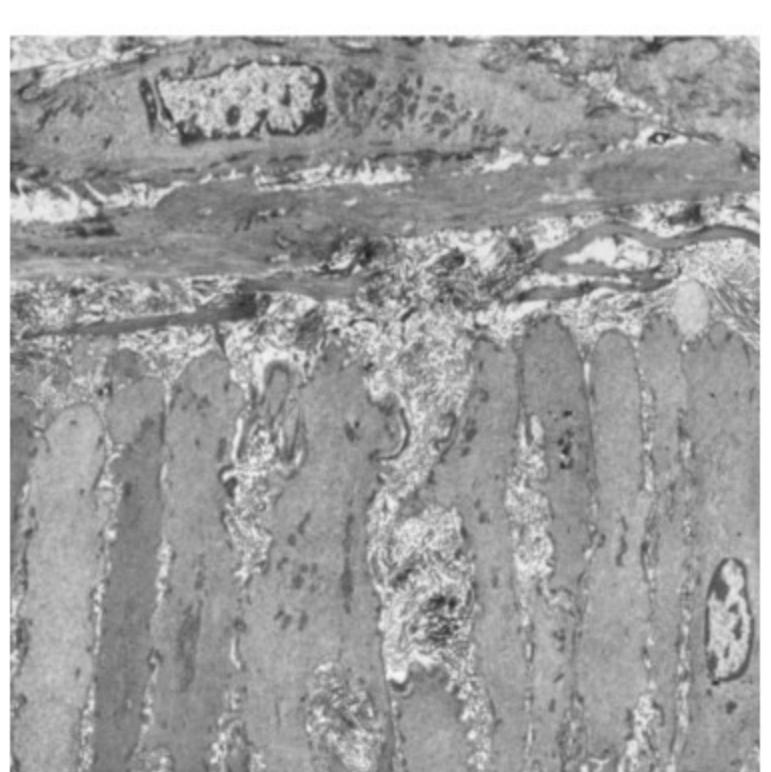

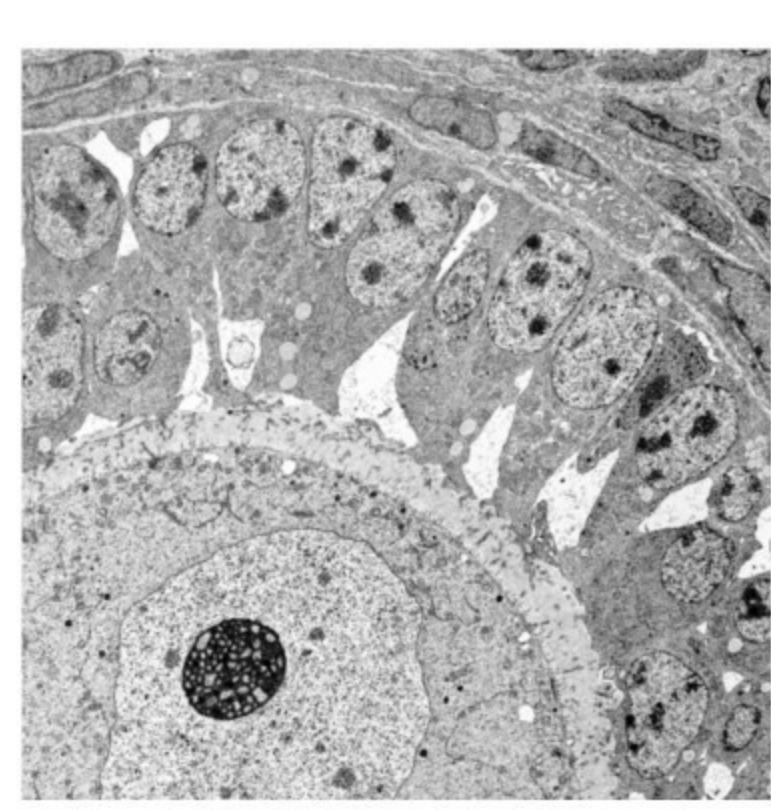

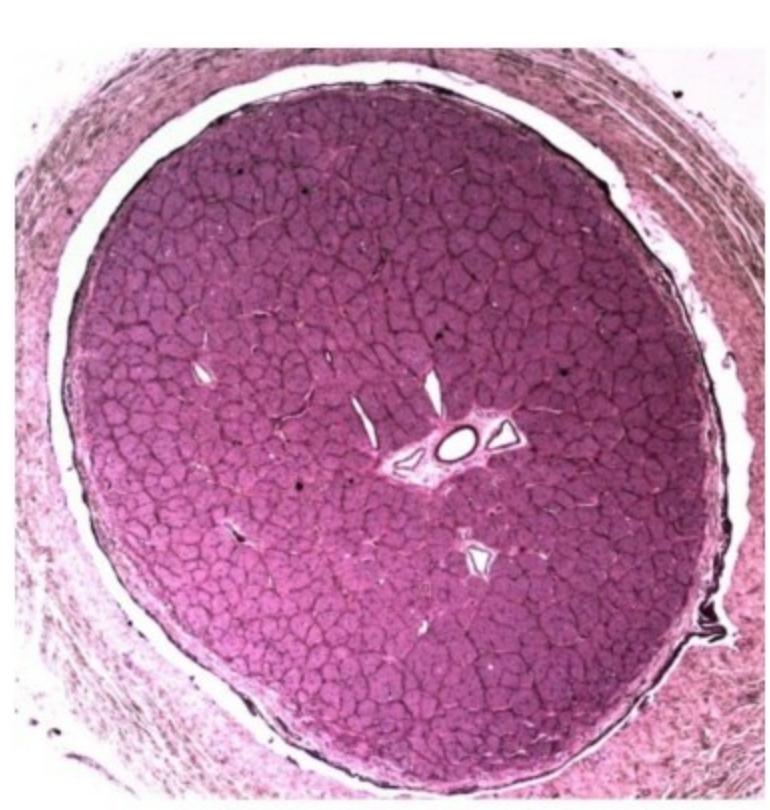

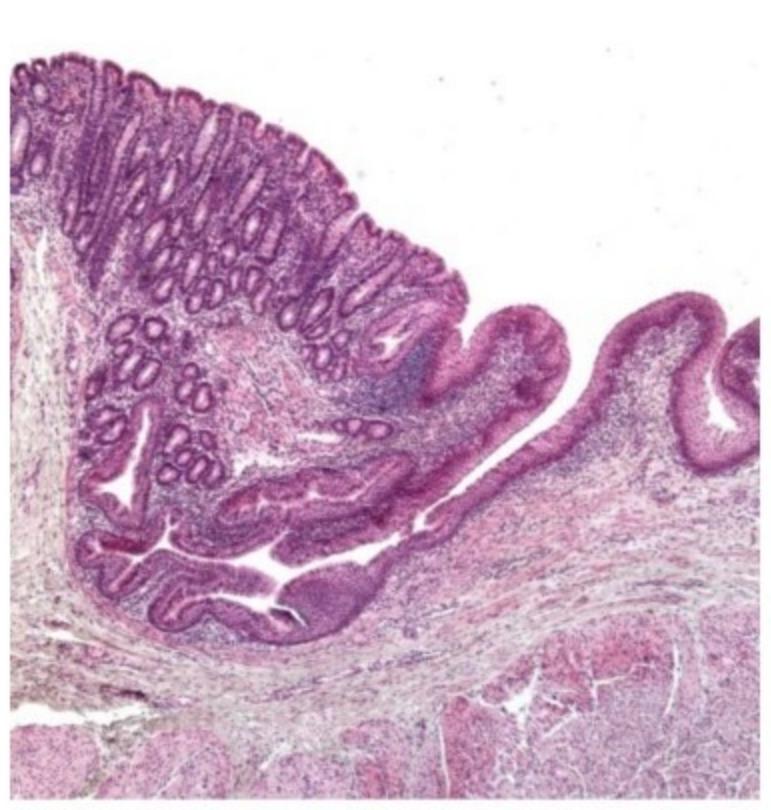

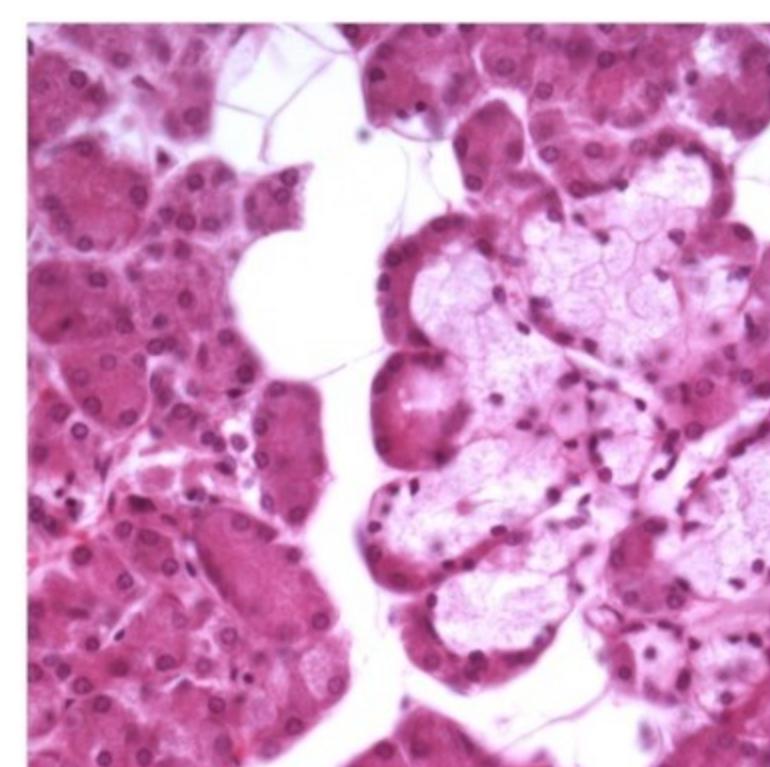

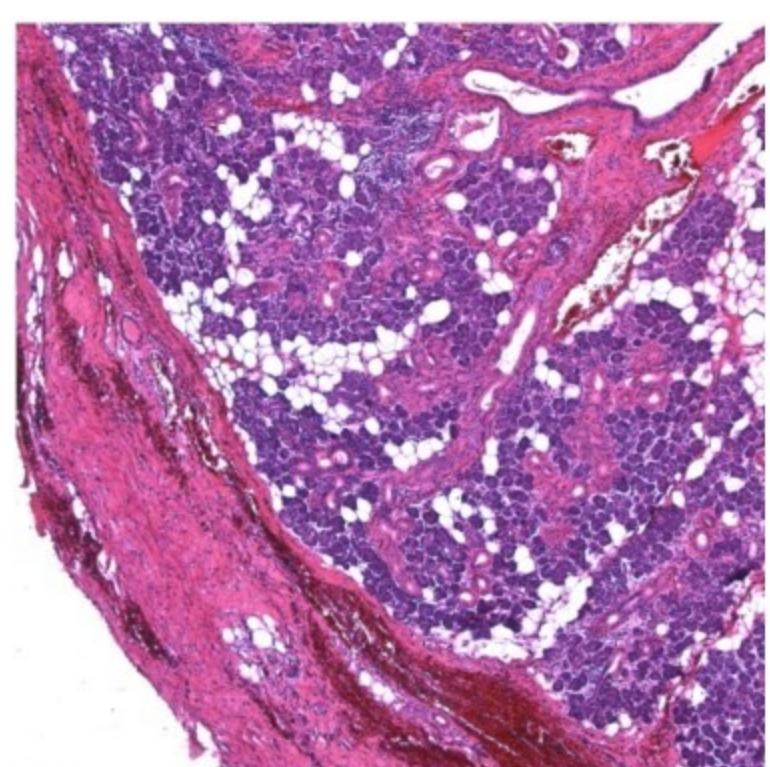

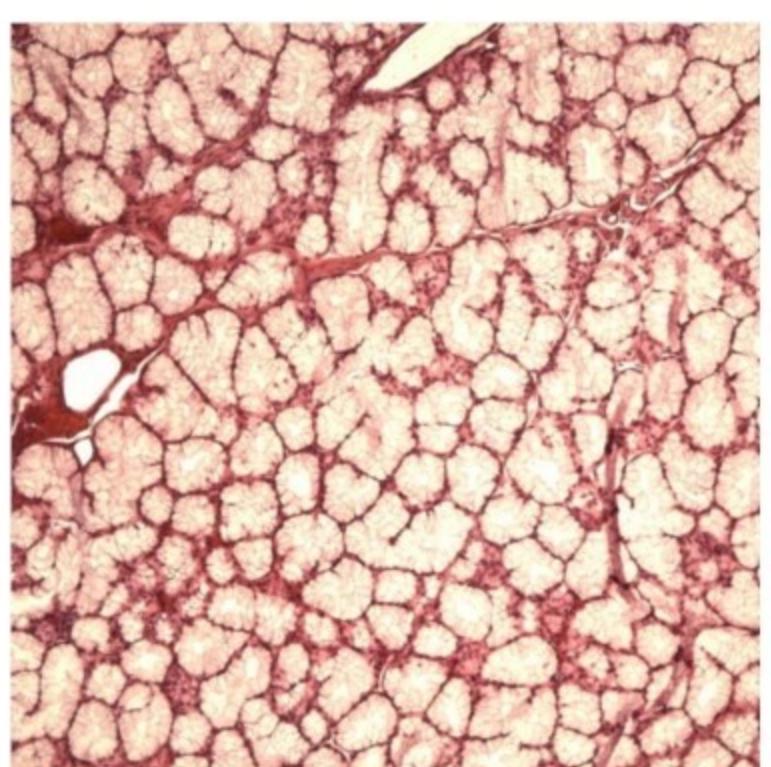

Vlákna hladké a kosterní svalové tkáň

Centriol
